

## Subject card

Subject name and code	Normative quality management systems, PG_00059508								
Field of study	Management and Production Engineering								
Date of commencement of studies	February 2023		Academic year of realisation of subject			2023/2024			
Education level	second-cycle studies		Subject group			Optional subject group Subject group related to scientific research in the field of study			
Mode of study	Full-time studies		Mode of delivery			at the university			
Year of study	1		Language of instruction			Polish			
Semester of study	2		ECTS credits			3.0			
Learning profile	general academic profile		Assessment form			assessment			
Conducting unit	Faculty of Management and Economics								
Name and surname	Subject supervisor	dr Mateusz Muchlado							
of lecturer (lecturers)	Teachers	dr Mateusz Muchlado							
Lesson types and methods	Lesson type	Lecture	Tutorial	Laboratory	Projec	:t	Seminar	SUM	
of instruction	Number of study hours	30.0	0.0	15.0	0.0		0.0	45	
	E-learning hours included: 0.0								
Learning activity and number of study hours	Learning activity Participation in classes included plan				Self-study SUM				
	Number of study 45 hours		5.0		25.0		75		
Subject objectives	Getting khnowlage of quality, safety and environmental management systems. Acquiring the ability to design and implement these systems in organizations.								
Learning outcomes	Course outcome		Subject outcome			Method of verification			
	[K7_K05] is able to integrate the possessed knowledge from various scientific disciplines, and in the innovative implementation of engineering tasks also take into account system and non-technical aspects, including ethical ones		The student is able to implement and use selected elements of Normative Management Systems in an organization.			[SK1] Assessment of group work skills			
	[K7_U03] can use information and communication techniques appropriate for acquiring and processing information and performing tasks typical for engineering activities		The student is able to select and use appropriate tools used in quality management			[SU4] Assessment of ability to use methods and tools			
	[K7_W01] knows and understands to a greater extent selected issues in the field of management and quality sciences and mechanical engineering, their location in the field of social sciences and engineering and technical sciences, as well as relationships with related disciplines, and sees the possibility of applying the knowledge in practice  [K7_U06] can - when formulating		The student has knowledge about the use of Normative Management Systems in various areas of the organization.  The student is able to develop and			[SW1] Assessment of factual knowledge			
	and solving engineering tasks - see their systemic aspects and social conditions, environmental, economic, legal and others		implement selected elements of Normative Management Systems.			fulfilment

Subject contents								
	1. Normative Management Systems of the ISO series; 2. The context of the organization in ISO Management Systems; 3. Leadership - its role in ISO Management Systems; 4. Planning requirements in ISO Management Systems; 5. Supporting the resources of the organization in the context of ISO 9001; 6. Determining the							
	requirements for products and services in the organization;7. Planning and design of development in the context of ISO 9001;8. Audit - a process improvement tool in the context of ISO management systems;9. Improving processes, products and services.							
Prerequisites and co-requisites	Basic knowledge of methods and tools used to design and improve processes.							
Assessment methods	Subject passing criteria	Passing threshold	Percentage of the final grade					
and criteria	Lab	60.0%	50.0%					
	Midterm colloquium	60.0%	50.0%					
Recommended reading	Basic literature	Materials from the lecture placed on the e-learning platform						
		2. Grudowski P. Docigning, currentising and improving the quality						
		2. Grudowski P. Designing, supervising and improving the quality system according to the PN-EN ISO 9001: 2009 standard based on						
		process approach						
	Supplementary literature							
	Supplementary increasure							
		1. ISO 9001 - the text of the standard						
		2. ISO 14001 - the text of the standard						
		3. ISO 450001 - the text of the standard						
		4. ISO 27001 - the text of the stan	ard					
		4. 100 21 001 - the text of the standard						
	eResources addresses	Adresy na platformie eNauczanie	:					
		Normatywne Systemy Zarządzan	Normatywne Systemy Zarządzania Jakością MECH (Zima 23/24) -					
		Moodle ID: 33070 https://enauczanie.pg.edu.pl/moodle/course/view.php?id=33070						
Example issues/		,	р. р					
example questions/								
tasks being completed								
	1. Interpret the concept of the organization's context and provide methods of its identification2. Identify the							
	risks and opportunities associated with the customer service process3. On what principles is ISO 9001 based?4. What normative management system is responsible for information security management?5. Plan an internal audit in the company in accordance with the requirements of the standard.							
Manta alaa a aasa t	Net applicable							
Work placement	Not applicable
