Subject objectives	<p>The class is supposed to guide students in practical skills related to the computer-aided design. The choice of tools is based on the desire to provide solutions as versatile as possible. In particular, the student shall be helped with:</p> <p>- understanding and creating standard paper product documentation (AutoCAD and similar programs)</p> <p>- understanding the specifics of 3D design, based on at least one of the currently popular programs (Fusion)</p> <p>- application of engineering simulation methods, primarily based on the FEA (free Salome pre-processor, ANSYS computing system)</p>						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	K7_W05		The student knows the commands of AutoCAD; he/she is able to use software such as Fusion 360, Salome, Ansys.		[SW3] Assessment of knowledge contained in written work and projects		
	K7_U04		The student is capable of creating a technical documentation of simple products.		[SU1] Assessment of task fulfilment
