

## Subject card

Subject name and code	Coordinatory planning, PG_00053463						
Field of study	Spatial Development						
Date of commencement of studies	February 2023		Academic year of realisation of subject		2023/2024		
Education level	second-cycle studies		Subject group		Obligatory subject group in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	2		Language of instruction		Polish		
Semester of study	3		ECTS credits		5.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Department of Urban Design and Regional Planning -> Faculty of Architecture						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. arch. Joanna Bach-Głowińska				
	Teachers		dr inż. arch. Joanna Bach-Głowińska				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	15.0	0.0	30.0	0.0	60
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	60		9.0		56.0	125
Subject objectives	Coordination Planning is a subject that aims to test the knowledge, skills in spatial planning and the ability to jointly organize work acquired by students so far. The tasks of students include a thorough analysis of the project topic in order to take appropriate actions aimed at its optimal solution. The aim of activities undertaken by students is to develop such a method of joint work and to coordinate it in such a way that the end result is a project of the entire team of people involved in it.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	K7_U03	The task of students is to organize work, including the schedule, defining the role of individuals, setting partial goals and expected results.	[SU1] Assessment of task fulfilment [SU2] Assessment of ability to analyse information [SU4] Assessment of ability to use methods and tools [SU5] Assessment of ability to present the results of task
	K7_W05	During the classes, the students' task is to use the information they have, but also to learn to work in a team under the conditions specified at the beginning of the class, i.e. as to the specified time, subject and methodology of work. During weekly, 3-hour meetings, students under the supervision of the course instructors undertake activities aimed at determining the most effective method of work and the ways of its implementation. The ability to integrate the acquired knowledge into the study	[SW3] Assessment of knowledge contained in written work and projects
	K7_K03	Developing the ability to understand the essence and correctness of using urban interventions as stimulants of development, taking into account multiple conditions. Development of such an undertaking taking into account the scenarios.	[SK3] Assessment of ability to organize work [SK4] Assessment of communication skills, including language correctness [SK5] Assessment of ability to solve problems that arise in practice [SK1] Assessment of group work skills [SK2] Assessment of progress of work
Subject contents	The classes are aimed at organizing the design process by students in which everyone participating in the classes will be involved. The actions taken that make up a harmonious whole are important. Each planned action should result from another and is designed to constitute a coherent whole in the end. Therefore, a team of people participating in the task, i.e. independent units sharing responsibility for work results, is particularly important here. On the other hand, individuals in a team depend on one another. The task of students is to organize work, including defining the role of individuals, setting partial goals and expected results		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	coordination in the project	30.0%	40.0%
	participation in a group study	40.0%	40.0%
	the organization of project work	30.0%	20.0%
