

Subject card

Subject name and code	Maritime and intermodal transport, PG_00057133							
Field of study	Ocean Engineering							
Date of commencement of studies	February 2023		Academic year of realisation of subject			2022/2023		
Education level	second-cycle studies		Subject group			Obligatory subject group in the field of study Subject group related to scientific		
						research in the field of study		
Mode of study	Full-time studies		Mode of delivery			at the university		
Year of study	1		Language of instruction			Polish		
Semester of study	1		ECTS credits			2.0		
Learning profile	general academic profile		Assessment form			assessment		
Conducting unit	Institute of Ocean Engineering and Ship Technology -> Faculty of Mechanical Engineering and Ship Technology							
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Daniel Piątek					
	Teachers dr inż. Daniel Piątek							
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Projec	:t	Seminar	SUM
	Number of study hours	30.0	0.0	0.0	0.0		0.0	30
	E-learning hours included: 0.0							
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study		SUM
	Number of study hours	30		5.0		15.0		50
Subject objectives	 - the role of maritime transport and its main means of shipping in global trade; - adaptation of the ship to the transport function; - integration of maritime transport with other modes of transport; 							
Learning outcomes	Course outcome		Subject outcome		Method of verification			
	[K7_W07] has knowledge on the development perspectives of ocean technology objects and systems, knows the newest and most relevant achievements in ocean technology		the student knows the advantages and disadvantages of various types of transport, can identify development trends			[SW3] Assessment of knowledge contained in written work and projects [SW2] Assessment of knowledge contained in presentation		
	[K7_W09] has organized, widened knowledge on the principles of sustainable development		the student knows the environmental impact of individual means of transport and is able to describe the technical measures to reduce this impact.		[SW3] Assessment of knowledge contained in written work and projects [SW2] Assessment of knowledge contained in presentation			
	[K7_W08] has knowledge necessary to understand economical, social and legal conditions and effects of engineering activities, knows general principles of initiating and develop forms of private entrepreneurship and has knowledge on the protection of industrial and intellectual property and on the copyrights		the student knows the main aspects related to the economics and safety of transport systems functioning			[SW3] Assessment of knowledge contained in written work and projects [SW2] Assessment of knowledge contained in presentation		

Data wydruku: 26.04.2024 21:46 Strona 1 z 2

Subject contents	- the role of a means of transport which is a sea ship in global transport;						
	- adaptation of the sea-going vessel to the transport function (technical solutions, economy, safety);						
	 transhipment terminals (containers, bulk products); links with inland, road and maritime transport (including intermodality); means and infrastructure of transport (inland, rail and rail); 						
	- the effect of types of transport;						
Prerequisites and co-requisites							
Assessment methods	Subject passing criteria	Passing threshold	Percentage of the final grade				
and criteria	test	60.0%	100.0%				
Recommended reading	Basic literature	GUCMA, S.: Inżynieria ruchu mo Gdańsk 2001.	GUCMA, S.: Inżynieria ruchu morskiego. Okrętownictwo i Żegluga. Gdańsk 2001.
