

Subject card

Subject name and code	, PG_00057174						
Field of study	Ocean Engineering						
Date of commencement of studies	February 2023	Academic year of realisation of subject			2023/2024		
Education level	second-cycle studies	Subject group			Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	1	Language of instruction			Polish		
Semester of study	2	ECTS credits			5.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Institute of Ocean Engineering and Ship Technology -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor		Filip Wasilczuk				
	Teachers		Filip Wasilczuk				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	15.0	0.0	30.0	0.0	75
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	75		15.0		35.0	125
Subject objectives	Aerodynamic aspects of off-shore wind turbines, effects related to the application of wind farms. Design of wind farms taking into account law, economics, ecologics and social aspects.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[K7_U05] can conduct an initial economic analysis of an investment in the range of ocean technology, indicate detailed rules of law and branch regulations	The student evaluates the wind farm design investment from the legal and economic side	[SU2] Assessment of ability to analyse information
	[K7_U07] in compliance with a formulated specification and with the aid of appropriate tools and methods, is able to complete an advanced engineering task within the range of design, construction and operation of ocean technology objects and systems	performs engineering tasks in the field of design, manufacturing and operation of wind farms	[SU3] Assessment of ability to use knowledge gained from the subject
	[K7_U08] can manage the work of a team, coordinate the conducting of a design or research task	leading the team and coordinating the execution of the project task	[SU4] Assessment of ability to use methods and tools [SU5] Assessment of ability to present the results of task
	[K7_W06] has an organized, widened knowledge on engineering methods and design tools allowing the conducting of advanced projects within the construction and operation of ocean technology objects and systems	knowledge on methods and tools for designing of offshore wind farms.	[SW1] Assessment of factual knowledge [SW3] Assessment of knowledge contained in written work and projects
	[K7_U04] can apply mathematical methods and models and computer simulations to analyse, design, and assess the functioning of ocean technology objects and systems and their elements	uses mathematical models and computer simulations to design and evaluate the performance of wind turbines and their components	[SU3] Assessment of ability to use knowledge gained from the subject
	[K7_W05] has an organized, widened knowledge on design, construction and operation of ocean technology objects and systems	broad knowledge on design and exploitation of off-shore wind farms	[SW1] Assessment of factual knowledge [SW3] Assessment of knowledge contained in written work and projects
	[K7_U06] when forming and solving design tasks can see their non-technical aspects, including environmental, economical and legal ones. Applies HSE rules and regulations	observation and analysis of environmental aspects	[SU2] Assessment of ability to analyse information [SU3] Assessment of ability to use knowledge gained from the subject

Subject contents	<ol style="list-style-type: none"> 1. Wind energy basics. 2. Wind resource assessment, obtaining wind data for simulations. 3. Obtaining Annual Energy Production (AEP) 4. Grid connection - basics. 5. Aspects to take into account while planning the wind farm <ol style="list-style-type: none"> a) Environmental aspects b) Law and policy aspects c) Societal aspects d) Conflicts of interest 6. Support mechanisms 7. Analysis of construction and maintenance cost, assessing Levelized Cost of Electricity (LCoE). 8. Floating wind turbines. 9. End of life repowering, decommissioning. 														
Prerequisites and co-requisites	basic fluid mechanics														
Assessment methods and criteria	<table border="1" data-bbox="448 1182 1490 1352"> <thead> <tr> <th data-bbox="448 1182 794 1227">Subject passing criteria</th> <th data-bbox="794 1182 1141 1227">Passing threshold</th> <th data-bbox="1141 1182 1490 1227">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td data-bbox="448 1227 794 1261">3) Presentation of report contents</td> <td data-bbox="794 1227 1141 1261">50.0%</td> <td data-bbox="1141 1227 1490 1261">10.0%</td> </tr> <tr> <td data-bbox="448 1261 794 1294">1) Technical report</td> <td data-bbox="794 1261 1141 1294">50.0%</td> <td data-bbox="1141 1261 1490 1294">50.0%</td> </tr> <tr> <td data-bbox="448 1294 794 1352">2) Technical report - py-wake calculations</td> <td data-bbox="794 1294 1141 1352">50.0%</td> <td data-bbox="1141 1294 1490 1352">40.0%</td> </tr> </tbody> </table>			Subject passing criteria	Passing threshold	Percentage of the final grade	3) Presentation of report contents	50.0%	10.0%	1) Technical report	50.0%	50.0%	2) Technical report - py-wake calculations	50.0%	40.0%
Subject passing criteria	Passing threshold	Percentage of the final grade													
3) Presentation of report contents	50.0%	10.0%													
1) Technical report	50.0%	50.0%													
2) Technical report - py-wake calculations	50.0%	40.0%
