

Subject card

Subject name and code	Physical and Chemical Aspects of Concrete Production, PG_00052968						
Field of study	Chemistry in Construction Engineering						
Date of commencement of studies	February 2023		Academic year of realisation of subject		2023/2024		
Education level	second-cycle studies		Subject group		Obligatory subject group in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	1		Language of instruction		Polish		
Semester of study	2		ECTS credits		3.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Department of Physical Chemistry -> Faculty of Chemistry						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. inż. Adam Kloskowski				
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	0.0	0.0	0.0	15.0	45
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	45		5.0		25.0	75
Subject objectives	The aim of the subject is to introduce the students to the matters of physicochemical properties of cement and concrete.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	K7_W03		student knows the physicochemical basis of the discussed problems		[SW1] Assessment of factual knowledge [SW2] Assessment of knowledge contained in presentation		
	K7_K01		student is able to broad his knowledge (individually and within a group) in the field, understands the need to update it and is able to convey the gained knowledge to others		[SK4] Assessment of communication skills, including language correctness [SK1] Assessment of group work skills		
	K7_U03		student is able to refer the conclusions from his scientific readings to others		[SU1] Assessment of task fulfilment [SU2] Assessment of ability to analyse information		
	K7_W02		student knows (and can use correctly) the concepts from the subject		[SW1] Assessment of factual knowledge [SW2] Assessment of knowledge contained in presentation		
Subject contents	Phase equilibria important in the cement chemistry. Hydration of the phases of the clinker / of cement. Rheological properties of the slurry. Properties of concrete. Cement additives.						

Prerequisites and co-requisites	Basic knowledge of inorganic and physical chemistry.		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
		60.0%	70.0%
		100.0%	30.0%
Recommended reading	Basic literature	Wiesław Kurdowski "Chemistry of Cement and Concrete", Wydawnictwo Polski Cement, Wydawnictwo Naukowe PWN, 2010	
	Supplementary literature	inorganic chemistry textbooks, physical chemistry textbooks	
	eResources addresses	Adresy na platformie eNauczanie:	
Example issues/ example questions/ tasks being completed			
Work placement	Not applicable
