

Subject card

Subject name and code	Practice, PG_00049102						
Field of study	Engineering and Technologies of Energy Carriers						
Date of commencement of studies	February 2023	Academic year of realisation of subject			2023/2024		
Education level	second-cycle studies	Subject group			Optional subject group Subject group related to practical vocational preparation		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	2	Language of instruction			Polish		
Semester of study	3	ECTS credits			24.0		
Learning profile	practical profile	Assessment form			assessment		
Conducting unit	Department of Chemistry and Technology of Functional Materials -> Faculty of Chemistry						
Name and surname of lecturer (lecturers)	Subject supervisor	dr inż. Radosław Pomećko					
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	0.0	0.0	0.0	0
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study	SUM	
	Number of study hours	0	100.0		500.0	600	
Subject objectives	The main task of practice is to evaluate and improve the technological skills and abilities of the student, which were acquired during the studies. The practice gives the chance to apply those skills in the technological processes in environment of the production plant.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	K7_U04	The student effectively applies the appropriate knowledge and abilities to complete the given tasks.			[SU4] Assessment of ability to use methods and tools [SU2] Assessment of ability to analyse information		
	K7_W01	The student has the knowledge and abilities to solve given technological problems.			[SW3] Assessment of knowledge contained in written work and projects		
	K7_K01	The student can analyze given problems and data, to find the right the solution.			[SK2] Assessment of progress of work [SK1] Assessment of group work skills		
	K7_K03	The student knows the role and importance of engineer profession.			[SK3] Assessment of ability to organize work [SK2] Assessment of progress of work		
K7_U01	The student has the knowledge and abilities collect and analyze data, to find the solution of technological problems			[SU2] Assessment of ability to analyse information [SU1] Assessment of task fulfilment			
Subject contents	The main task of practice is to evaluate and improve the technological skills and abilities of the student, which were acquired during the studies. The practice gives the chance to apply those skills in the technological processes in environment of the production plant.						
Prerequisites and co-requisites	The student has appropriate knowledge of chemical engineering						
Assessment methods and criteria	Subject passing criteria	Passing threshold			Percentage of the final grade		
		100.0%			10.0%		
		100.0%			50.0%		
		60.0%			40.0%		

Recommended reading	Basic literature	The rules of students practice at Faculty of Chemistry, Gdansk University of Technology, (https://chem.pg.edu.pl/studenci/praktyki-istaze).
		BHP guidance, technological statements and other materials given by the host institution.
	Supplementary literature	Not indicated
	eResources addresses	Adresy na platformie eNauczenie:
Example issues/ example questions/ tasks being completed		
Work placement	Not applicable
