

Subject card

Subject name and code	Thesis Seminar , PG_00041037						
Field of study	Transport						
Date of commencement of studies	February 2023	Academic year of realisation of subject			2023/2024		
Education level	second-cycle studies	Subject group			Optional subject group		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	2	Language of instruction			Polish		
Semester of study	3	ECTS credits			3.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Department of Transportation Engineering -> Faculty of Civil and Environmental Engineering						
Name and surname of lecturer (lecturers)	Subject supervisor	dr hab. inż. Joanna Żukowska					
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	0.0	30.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study		SUM
	Number of study hours	30	10.0		35.0		75
Subject objectives	The student develops concepts for solving a defined topic, based on the knowledge acquired during the studies. He briefly presents the assumptions of his work in front of the group. In public discussion, he defends the theses and proposed solutions presented in the paper. Draws conclusions from the public discussion on the presentation of the thesis.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K7_K01] able to think and act creatively and enterprisingly; able to define priorities to support the delivery of an individual or group task; understands the need for continuous education and taking responsibility as a professional for their work and the work of the team	The student plans his worktime in a perspective mode, including prior scheduling of work stages, supervises fulfilment of work stages, verifies the assumed workplan			[SK5] Assessment of ability to solve problems that arise in practice		
	[K7_U03] able to speak properly and clearly about a transport problem using modern audiovisual techniques	The student is capable of exploring the achieved scientific foundations to solve a specific problem			[SU3] Assessment of ability to use knowledge gained from the subject		
	[K7_U04] able to speak the science and technology language as customary in the transport community and in other related fields	The student schedules and completes the work, including all its stages making use of routines of science and technology			[SU5] Assessment of ability to present the results of task		
Subject contents	Presentation of papers on topics related to the thesis. Discussion on the papers and their presentation.						
Prerequisites and co-requisites							
Assessment methods and criteria	Subject passing criteria	Passing threshold			Percentage of the final grade		
	Presentations, discussions	80.0%			100.0%		
Recommended reading	Basic literature	Research reports, conference materials, technical and scientific journals, books, internet on the subject of the thesis.					
	Supplementary literature	No requirements.					
	eResources addresses	Adresy na platformie eNauczenie:					
Example issues/ example questions/ tasks being completed	Not applicable.						
Work placement	Not applicable
