

## Subject card

Subject name and code	Metrology I, PG_00056913								
Field of study	Electrical Engineering								
Date of commencement of						2023			
studies	OCIODEI 2022		Academic year of realisation of subject			2022/2023			
Education level	first-cycle studies		Subject group						
Mode of study	Full-time studies		Mode of delivery			at the university			
Year of study	1		Language of instruction			Polish			
Semester of study	2		ECTS credits			4.0			
Learning profile	general academic profile		Assessment form			exam			
Conducting unit	Department of Metrology and Information Systems -> Faculty of Electrical and Control Engineering						ring		
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Marek Wołoszyk						
	Teachers dr inż. Marek Wołoszyk								
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	ry Project Semin		Seminar	SUM	
	Number of study hours	30.0	0.0	0.0			0.0	30	
	E-learning hours included: 0.0								
Learning activity and number of study hours	Learning activity	ng activity Participation in classes include plan		Participation in consultation hours		Self-study St		SUM	
	Number of study 30 hours			15.0		55.0		100	
Learning outcomes	Course outcome		Subject outcome			Method of verification			
	K6_K01		Student correctly selects standard measuring instruments. Student is able to use current literature sources in order to supplement and to develop his or her knowledge.			[SK5] Assessment of ability to solve problems that arise in practice			
	K6_U02		Student is able to work individually and in a group, knows how to estimate the time needed to carry out the task, and is able to implement the work schedule.			[SU1] Assessment of task fulfilment			
	K6_W05		Student selects appropriate measurement tools for testing of various electrical parameters. Student describes the methods of evaluation of measurement faults and calculates measurement uncertainty.			[SW3] Assessment of knowledge contained in written work and projects			
Subject contents  Prerequisites	LECTURE Meaning and tasks of Metrology. Measurement services. Units in measurement. Elaboration of experiment measurement results. Measurement error theory. Systematic, random and insensibility inaccuracy. Inaccuracy classes. Measurement uncertainty definition. Analog electric meters. DC and AC measurement bridges. RLC measurements. Compensation methods. Power measurements of 1 and 3-phase devices in electric power engineering. Reactive power measurements. Electrical energy measurements. Digital and analog measurement of electronic systems. Principles of measurement of electronic systems (amplifier, standarizing devices, basic transducers and analog filters). Principles of ADC and DAC methods. Digital measurement of voltage, frequency and time. Analog and digital oscilloscope. The basics of magnetic measurement. Principles of operational tests in electrical engineering.  Basic knowledge of electrical engineering and electrical circuit analysis.								
and co-requisites

Assessment methods	Subject passing criteria	Passing threshold	Percentage of the final grade				
and criteria	Exam	60.0%	100.0%				
Recommended reading	Basic literature	Chwaleba A., Poniński M., Siedlecki A.: Metrologia elektryczna. WNT, 2014.					
		wa. WNT, 2016.					
	Supplementary literature	Stabrowski M.: Miernictwo elektryczne. Cyfrowa technika pomiarowa. Oficyna Wydawnicza Politechniki Warszawskiej, 1999. 2. Piotrowski J.: Podstawy miernictwa. WNT, 2002.					
	eResources addresses	Adresy na platformie eNauczanie:					
Example issues/ example questions/ tasks being completed	Discuss the measurement of error band Wheatstone bridge.      Provide a system for the measurement of reactive power in a 3-wire electrical network.						
	2. I Tovide à system for the measurement of reactive power in à 3-wire electrical network.						
	3. Discuss the operation of the A / D converter type compensation.						
	4. Discuss the requirements for proper measurement of earth resistance.						
Work placement	Not applicable						
Work placement	Τιστ αργιισανίο
