

Subject card

Subject name and code	Thesis Seminar , PG_00041398						
Field of study	Civil Engineering						
Date of commencement of studies	February 2023	Academic year of realisation of subject			2023/2024		
Education level	second-cycle studies	Subject group			Optional subject group		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	2	Language of instruction			Polish		
Semester of study	3	ECTS credits			3.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Department of Concrete Structures -> Faculty of Civil and Environmental Engineering						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. inż. Jerzy Bobiński				
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	0.0	0.0	45.0	45
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	45		5.0		25.0	75
Subject objectives	The student learns the rules of developing a master's diploma. He gets acquainted with scientific and technical literature related to the topic of work and current engineering solutions in civil engineering. He can formulate a problem, choose the right methods of solution, and use modern design tools. He can present the main issues related to the solutions he has adopted, he can discuss and draw conclusions from a public discussion in a group.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K7_U15] has advanced skills in civil engineering within offered specialization/profile		The student has an extended knowledge of reinforced concrete structures.				
	[K7_K02] Recognizes the significance of knowledge in solving cognitive and practical problems; reliably evaluates results of his own and team research		The student is able to present, on the basis of literature, the issue of reinforced concrete structures regarding the diploma thesis				
	[K7_W15] has deep and adequate knowledge of civil engineering, within offered specialization and profile		The student is able to formulate and present opinions on reinforced concrete structures				
	[K7_W02] knows principles of analysis, design and dimensioning of complex constructions and its elements		The student is able to formulate and present opinions on reinforced concrete structures				
Subject contents	Presentation of the progress of the thesis and discussion of emerging problems. Presentation of current scientific and technical problems related to reinforced concrete structures.						
Prerequisites and co-requisites							
Assessment methods and criteria	Subject passing criteria		Passing threshold		Percentage of the final grade		
	Presentation of the diploma		50.0%		100.0%		
Recommended reading	Basic literature		Current scientific and technical literature				
	Supplementary literature		see above
