GDAŃSK UNIVERSITY OF TECHNOLOGY

Subject card

Subject name and code	Database Systems, PG_00038299		
Field of study	Automation, Robotics and Control Systems		
Date of commencement of studies	October 2022	Academic year of realisation of subject	2022/2023
Education level	second-cycle studies	Subject group	
Mode of study	Part-time studies	Mode of delivery	at the university
Year of study	1	Language of instruction	Polish
Semester of study	2	ECTS credits	4.0
Learning profile	general academic profile	Assessment form	exam
Conducting unit	Faculty of Electrical and Control Engineering		
Name and surname of lecturer (lecturers)	Subject supervisor	dr inż. Robert Smyk	
	Teachers	dr inż. Daniel Wachowiak	

Lesson types and methods of instruction

Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
Number of study hours	10.0	0.0	10.0	0.0	0.0	20

E-learning hours included: 0.0

Learning activity and number of study hours

Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM
Number of study hours	20	10.0	70.0	100

Subject objectives

Intruduction of the data base rationale. Description of data base characteristics.
Introduction to programing in SQL and writing SQL sueries. Data Manipulation Language. Data Definition Language. Data Query Language.

Learning outcomes

Course outcome	Subject outcome	Method of verification
K7_W02	The student uses basic utility programs available in text mode and graphics mode to configure and administer the database system	[SW2] Assessment of knowledge contained in presentation
K7_W05	The student knows of basic methods of extracting data from database	[SW1] Assessment of factual knowledge
K7_U07	The student knows the principle of building a table in relational DB	[SU3] Assessment of ability to use knowledge gained from the subject
K7_K06	The student knows the relational data model	[SK5] Assessment of ability to solve problems that arise in practice
K7_U10	The student knows the basic concepts related to databases, knows the basic syntax of SQL	[SU1] Assessment of task fulfilment

Subject contents

Databases rationale. Database characteristics.
Relational data model. Indexing in relational databases.
Programming in SQL Queries, projection, expressions, aliases. WHERE clause and logical conditions. HAVING, GROUP BY clauses and aggregating functions. Relation joins. Sub-queries. Adding and modifying records. Creating tables.

Prerequisites and co-requisites

Assessment methods and criteria

Subject passing criteria	Passing threshold	Percentage of the final grade
homeworks	60.0%	25.0%
Final test	60.0%	50.0%
Introductory tests	60.0%	25.0%
