

Subject card

Subject name and code	PROJECT MANAGEMENT, PG_00060060						
Field of study	Environmental Engineering						
Date of commencement of studies	February 2023	Academic year of realisation of subject			2022/2023		
Education level	second-cycle studies	Subject group			Optional subject group Humanistic-social subject group		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	1	Language of instruction			English		
Semester of study	1	ECTS credits			3.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Department of Building Engineering -> Faculty of Civil and Environmental Engineering						
Name and surname of lecturer (lecturers)	Subject supervisor	dr inż. Magdalena Pawelska-Mazur					
	Teachers	dr inż. Magdalena Pawelska-Mazur					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	15.0	0.0	0.0	0.0	45
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study	SUM	
	Number of study hours	45	5.0		30.0	80	
Subject objectives	The course broadens students understanding of project and project management; students will be able to apply basic tools and techniques of project management in practice; write a sponsor and project requirements definition; construct a comprehensive project schedule; evaluate a project plan subject to time, cost and resource constraints. Also The course develops the fundamental skills required of all project managers from both a theoretical and practical viewpoint.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	K7_W05	The student has knowledge of construction and the impact of construction investments on the environment.			[SW2] Assessment of knowledge contained in presentation		
	K7_U04	The student is able to prepare and present a presentation on the project task and lead a discussion on the presented presentation.			[SU5] Assessment of ability to present the results of task		
	K7_U12	The student is able to assess the technical solutions and functioning of environmental engineering facilities and systems			[SU1] Assessment of task fulfilment		
	[K7_W02] has broadened and well-ordered knowledge of the current law on construction, water, environmental protection and planning and spatial planning.	The student will have the ability to work in teams, international ones, taking them different roles of leadership			[SW1] Assessment of factual knowledge		
[K7_W71] has general knowledge in humanistic, social, economic or legal sciences, including their fundamentals and applications	Student will be able to use theoretical knowledge to solve some problems in the implementation of the project			[SW3] Assessment of knowledge contained in written work and projects			
Subject contents	Definition of a project; project characteristics; classification of projects; meaning and scope of projects and project management; project life cycles; project processes, the roles of the project manager, scope management, building a work break structure, stakeholders management; stakeholders roles; responsibility matrix; time planning the process; activity identification; identify activity relationships; estimating; creating a network; activity on arrow diagram and critical path analysis; activity-on-node diagrams; estimating project time; effective time management; scheduling - Gantt charts; assign and level resources; Program Evaluation Review Techniques (PERT); cost planning process; cost estimating techniques; cost build-up; cost management budgets; risk management; identify the risk; risk quantification techniques; how to reduce the risk;						

Prerequisites and co-requisites	no prerequisites		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	final test (multiple choice)	60.0%	50.0%
	group project	60.0%	50.0%
