

Subject card

Subject name and code	Fiberoptic Data Transmission Networks, PG_00048692						
Field of study	Electronics and Telecommunications, Biomedical Engineering, Biomedical Engineering, Biomedical Engineering						
Date of commencement of studies	February 2023	Academic year of realisation of subject			2023/2024		
Education level	second-cycle studies	Subject group			Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	2	Language of instruction			Polish		
Semester of study	3	ECTS credits			5.0		
Learning profile	general academic profile	Assessment form			exam		
Conducting unit	Department of Metrology and Optoelectronics -> Faculty of Electronics, Telecommunications and Informatics						
Name and surname of lecturer (lecturers)	Subject supervisor		prof. dr hab. inż. Małgorzata Szczerska				
	Teachers		prof. dr hab. inż. Małgorzata Szczerska				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	0.0	0.0	30.0	0.0	60
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	60		5.0		60.0	125
Subject objectives	Students are taught to: 1 analyze the dispersion and delay of signals in fiber-optic system. 2 analyze the power balance in the fiber-optic system. 3 a noise analysis in a fiber-optic system. 4 design fiber optic transmission links based on the received requirements.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[K7_W02] Knows and understands, to an increased extent, selected laws of physics and physical phenomena, as well as methods and theories explaining the complex relationships between them, constituting advanced general knowledge in the field of technical sciences related to the field of study	The student knows and understands the impact of noise, dispersion and non-linear phenomena on the transmission of optical signals in the optical fiber path.	[SW1] Assessment of factual knowledge
	[K7_W03] Knows and understands, to an increased extent, the construction and operating principles of components and systems related to the field of study, including theories, methods and complex relationships between them and selected specific issues - appropriate for the curriculum.	Student knows fiber optic networks and their structures, structure and parameters of fiber optic path elements	[SW1] Assessment of factual knowledge
	[K7_U03] can design, according to required specifications, and make a complex device, facility, system or carry out a process, specific to the field of study, using suitable methods, techniques, tools and materials, following engineering standards and norms, applying technologies specific to the field of study and experience gained in the professional engineering environment	He can design a fiber optic network.	[SU1] Assessment of task fulfilment
	[K7_U06] can analyse the operation of components, circuits and systems related to the field of study; measure their parameters; examine technical specifications; interpret obtained results and draw conclusions	Student is able to analyze the operation of fiber optic network elements, systems and systems.	[SU1] Assessment of task fulfilment

Subject contents	<ol style="list-style-type: none"> 1. Introduction. 2. Fiber optic communication system. 3. Lightwave fundamentals. 4. Integrated Optic Waveguides. 5. Optic fiber waveguide. 6. Optical sources and amplifiers. 7. Light detectors. 8. Couplers and connectors. 9. Distribution network. 10. WDM and DWDM system. 11. OTDM system. 12. OCDM system. 13. Noise and detection. 14. Design of analog system. 15. Design of digital system. 16. Measurements in optical systems. 		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	project	60.0%	50.0%
	exam	60.0%	50.0%
