

Subject card

| Subject name and code | Fiberoptic Data Transmission Networks, PG_00048692 | | | | | | | | |
|---|---|---|---|--------------|----------------|---|------------|-----|--|
| Field of study | Electronics and Telecommunications, Biomedical Engineering, Biomedical Engineering, Biomedical Engineering | | | | | | | | |
| Date of commencement of studies | February 2023 | | Academic year of realisation of subject | | | 2023/2024 | | | |
| Education level | second-cycle studies | | Subject group | | | Optional subject group Subject group related to scientific research in the field of study | | | |
| Mode of study | Full-time studies | | Mode of delivery | | | at the | university | | |
| Year of study | 2 | | Language of instruction | | | Polish | | | |
| Semester of study | 3 | | ECTS cred | ECTS credits | | | 5.0 | | |
| Learning profile | general academic profile | | Assessment form | | exam | | | | |
| Conducting unit | Department of Metrology and Optoelectronics -> Faculty of Electronics, Telecommunications and Informatics | | | | | | | | |
| Name and surname | Subject supervisor | | prof. dr hab. inż. Małgorzata Szczerska | | | | | | |
| of lecturer (lecturers) | Teachers | | prof. dr hab. inż. Małgorzata Szczerska | | | | | | |
| Lesson types and methods | Lesson type | Lecture | Tutorial | Laboratory | Projec | t | Seminar | SUM | |
| of instruction | Number of study hours | 30.0 | 0.0 | 0.0 30.0 0.0 | | 60 | | | |
| | E-learning hours included: 0.0 | | | | | | | | |
| Learning activity and number of study hours | Learning activity | Participation in didactic Participation in classes included in study plan | | | Self-study SUM | | SUM | | |
| | Number of study hours | 60 | | 5.0 | | 60.0 | | 125 | |
| Subject objectives | Students are taught to: 1 analyze the dispersion and delay of signals in fiber-optic system. 2 analyze the power balance in the fiber-optic system. 3 a noise analysis in a fiber-optic system. 4 design fiber optic transmission links based on the received requirements. | | | | | | | | |

| Learning outcomes | Course outcome | Subject outcome | Method of verification |
| | [K7_W02] Knows and understands, to an increased extent, selected laws of physics and physical phenomena, as well as methods and theories explaining the complex relationships between them, constituting advanced general knowledge in the field of technical sciences related to the field of study | The student knows and understands the impact of noise, dispersion and non-linear phenomena on the transmission of optical signals in the optical fiber path. | [SW1] Assessment of factual knowledge |
| | [K7_W03] Knows and understands, to an increased extent, the construction and operating principles of components and systems related to the field of study, including theories, methods and complex relationships between them and selected specific issues - appropriate for the curriculum. | Student knows fiber optic networks and their structures, structure and parameters of fiber optic path elements | [SW1] Assessment of factual knowledge |
| | [K7_U03] can design, according to required specifications, and make a complex device, facility, system or carry out a process, specific to the field of study, using suitable methods, techniques, tools and materials, following engineering standards and norms, applying technologies specific to the field of study and experience gained in the professional engineering environment | He can design a fiber optic network. | [SU1] Assessment of task fulfilment |
| | [K7_U06] can analyse the operation of components, circuits and systems related to the field of study; measure their parameters; examine technical specifications; interpret obtained results and draw conclusions | Student is able to analyze the operation of fiber optic network elements, systems and systems. | [SU1] Assessment of task fulfilment |
