

## Subject card

| Subject name and code                       | Mathematical analysis II, PG_00037260   |         |   |                       |                |  |         |     |  |
|---|---|---------|---|-----------------------|----------------|--|---------|-----|--|
| Field of study                              | Technical Physics   |         |   |                       |                |  |         |     |  |
| Date of commencement of studies             | October 2023  |         | Academic year of realisation of subject   |                       |                | 2023/2024  |         |     |  |
| Education level                             | first-cycle studies   |         | Subject group   |                       |                | Obligatory subject group in the field of study Subject group related to scientific |         |     |  |
|   |   |         |   |                       |                | research in the field of study   |         |     |  |
| Mode of study                               | Full-time studies   |         | Mode of delivery  |                       |                | at the university  |         |     |  |
| Year of study                               | 1   |         | Language of instruction   |                       |                | Polish   |         |     |  |
| Semester of study                           | 2   |         | ECTS credits  |                       |                | 6.0  |         |     |  |
| Learning profile                            | general academic profile  |         | Assessment form   |                       |                | exam   |         |     |  |
| Conducting unit                             | Department of Probability Theory an   |         | nd Biomathematics -> Faculty of Applied Physics and Mathematics   |                       |                |  |         |     |  |
| Name and surname of lecturer (lecturers)    | Subject supervisor dr hab. Paweł Możejko  |         |   |                       |                |  |         |     |  |
|   | Teachers  |         | dr hab. Paweł Możejko   |                       |                |  |         |     |  |
|   | mgr inż.  |         |   | r inż. Natalia Tańska |                |  |         |     |  |
| Lesson types and methods                    | Lesson type   | Lecture | Tutorial  | Laboratory            | Projec         | t  | Seminar | SUM |  |
| of instruction                              | Number of study hours   | 30.0    | 30.0  | 0.0                   | 0.0            |  | 0.0     | 60  |  |
|   | E-learning hours included: 0.0  |         |   |                       |                |  |         |     |  |
| Learning activity and number of study hours | Learning activity Participation in classes include plan   |         |   |                       | Self-study SUM |  | SUM     |     |  |
|   | Number of study hours   | 60      |   | 10.0                  |                | 80.0   |         | 150 |  |
| Subject objectives                          | To equip students with the knowledge that supports technical items  |         |   |                       |                |  |         |     |  |
| Learning outcomes                           | Course outcome  |         | Subject outcome   |                       |                | Method of verification   |         |     |  |
|   |   |         | Student understands mathematical theorems and it uses with they of solving exercises. Can calculate integrals and knows applications of integrals. Study infinite series of numbers and series of functions. Student can make differential and integral calculus of multivariate function like partial derivatives, multiple integration. |                       |                | [SW1] Assessment of factual knowledge  |         |     |  |
|   | [K6_U01] Can learn independently, obtain information from literature, databases and other properly selected sources.  |         | Student understands the importance of studying by himself. Student is practising by himself.  |                       |                | [SU2] Assessment of ability to analyse information                                 |         |     |  |
| Subject contents                            | Integral calculus of the function of one variable. An infnite series of numbers and functions (Taylor series, Fourier series). Differential and integral calculus of multivariate function - Partial derivatives, Multiple integration. |         |   |                       |                |  |         |     |  |
| Prerequisites and co-requisites             | Student knows basics of differential calculus of the function of one variable.  |         |   |                       |                |  |         |     |  |
| Assessment methods and criteria             | Subject passing criteria  |         | Passing threshold   |                       |                | Percentage of the final grade  |         |     |  |
|   | Colloquium 2  |         | 0.0%  |                       |                | 26.0%  |         |     |  |
|   | Colloquium 1  |         | 0.0%  |                       |                | 26.0%  |         |     |  |
|   | Exam  |         | 50.0%   |                       |                | 44.0%  |         |     |  |
|   | Activity  | 0.0%    |   |                       | 4.0%           |  |         |     |  |
