

## Subject card

Subject name and code	Safety issues in radiation physics , PG_00060255								
Field of study	Biomedical Engineering, Biomedical Engineering, Biomedical Engineering								
Date of commencement of studies	February 2023		Academic year of realisation of subject			2022/2023			
Education level	second-cycle studies		Subject group			Subject group related to scientific research in the field of study			
Mode of study	Full-time studies		Mode of delivery			at the university			
Year of study	1		Language of instruction			Polish			
Semester of study	1		ECTS credits			2.0			
Learning profile	general academic profile		Assessment form			assessment			
Conducting unit	Instytut Fizyki i Informatyki Stosowanej -> Faculty of Applied Physics and Mathematics								
Name and surname of lecturer (lecturers)	Subject supervisor		dr Brygida Mielewska						
	Teachers		dr Brygida Mielewska						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Projec	:t	Seminar	SUM	
	Number of study hours	8.0	7.0	0.0	0.0		0.0	15	
	E-learning hours included: 0.0								
Learning activity and number of study hours	Learning activity	Participation in classes include plan				Self-study		SUM	
	Number of study hours	15		0.0		0.0		15	
Subject objectives	The aim of the course is to familiarize students with the conditions of safe work with high-energy radiation sources, in particular accelerators, including radiotherapeutic ones								
Learning outcomes	Course outcome		Subject outcome			Method of verification			
	[K7_W08] Knows and understands, to an increased extent, the fundamental dilemmas of modern civilisation, the main development trends of scientific disciplines relevant to the field of education.		The student develops and discusses selected issues in the field of work safety with accelerators			[SW3] Assessment of knowledge contained in written work and projects			
	[K7_U09] can carry out a critical analysis of the functioning of existing technical solutions and assess these solutions, as well as apply experience related to the maintenance of advanced technical systems, devices and facilities typical for the field of studies, gained in the professional engineering environment					[SU1] Assessment of task fulfilment [SU2] Assessment of ability to analyse information
