

## Subject card

Subject name and code	Construction project II, PG_00055845									
Field of study	Architecture									
Date of commencement of studies	October 2023	Academic year of realisation of subject			2024/2025					
Education level	first-cycle studies	Subject group			Optional subject group Subject group related to scientific research in the field of study					
Mode of study	Full-time studies	Mode of delivery			at the university					
Year of study	2	Language of instruction			Polish					
Semester of study	4	ECTS credits			3.0					
Learning profile	general academic profile	Assessment form			assessment					
Conducting unit	Department of Technical Fundamentals of Architecture Design -> Faculty of Architecture									
Name and surname of lecturer (lecturers)	Subject supervisor	dr inż. arch. Marek Sztafrowski								
	Teachers	dr inż. arch. Marek Sztafrowski								
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM			
	Number of study hours	0.0	0.0	0.0	45.0	0.0	45			
	E-learning hours included: 0.0									
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study	SUM				
	Number of study hours	45	5.0		25.0	75				
Subject objectives	Knowledge of technical issues related to the construction technical project. Knowledge of basic issues related to reinforced concrete and masonry structures, and relations between loads and stresses and deformations in simple elements made of reinforced concrete									
Learning outcomes	Course outcome	Subject outcome			Method of verification					
	[K6_U04] is able to use analytical methods to formulate and solve project tasks	is able to use analytical methods to formulate and solve project tasks			[SU2] Assessment of ability to analyse information					
	[K6_W01] knows and understands construction problems, building and engineering issues related to building design; principles, solutions, constructions and building materials used in simple engineering tasks in the field of architectural and urban design	Knowledge and understanding of: construction and building issues related to building design; principles, solutions, constructions and building materials applied to perform simple tasks in the field of architectural design.			[SW1] Assessment of factual knowledge [SW3] Assessment of knowledge contained in written work and projects					
Subject contents	Basic issues related to reinforced concrete and masonry structures. Pre-design works. Architectural, construction and technical design.									
Prerequisites and co-requisites										
Assessment methods and criteria	Subject passing criteria	Passing threshold			Percentage of the final grade					
	correctness of the design solution	100.0%			100.0%
