

Subject card

Subject name and code	Manufacturing Engineering I, PG_00060453						
Field of study	Mechanical and Naval Engineering						
Date of commencement of studies	October 2023	Academic year of realisation of subject			2023/2024		
Education level	first-cycle studies	Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Part-time studies	Mode of delivery			at the university		
Year of study	1	Language of instruction			Polish		
Semester of study	2	ECTS credits			5.0		
Learning profile	general academic profile	Assessment form			exam		
Conducting unit	Division of Manufacturing and Production Engineering -> Institute of Manufacturing and Materials Technology -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor	dr hab. inż. Daniel Chuchała					
	Teachers	dr hab. inż. Daniel Chuchała dr inż. Aleksandra Suchta dr inż. Sławomir Szymański					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	18.0	0.0	18.0	0.0	0.0	36
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study	SUM	
	Number of study hours	36	8.0		81.0	125	
Subject objectives	Preparation for recognizing the processes of manufacturing mechanical elements						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[K6_U15] is able to select appropriate measuring tools and techniques for qualitative verification of manufactured or in-service machinery and ship parts, is able to make basic measurements using basic measuring tools for qualitative verification of machinery and ship parts	Students will be able to select and carry out appropriate measurements of the workmanship of typical mechanical parts depending on the quality class using basic measuring tools, e.g. calliper, micrometer, slot gauge, thread outline gauges.	[SU4] Assessment of ability to use methods and tools
	[K6_U09] is able to plan the manufacturing, assembly and quality control processes of typical constructions and mechanical devices, estimating their costs	The student is able to select the correct parameters of the cutting process with the use of tool catalogs, also in on-line versions, for a given set of workpiece material and cutting edge material	[SU4] Assessment of ability to use methods and tools
	[K6_U08] is able to design a technological manufacturing process for typical elements of machines or devices, using analytical and numerical calculating tools	The student is able to calculate the necessary kinematic and geometric parameters in designed machining processes for typical machine elements	[SU3] Assessment of ability to use knowledge gained from the subject
	[K6_U04] is able to perform a critical analysis of the existing technical solutions, present the specification of the technology of manufacturing basic construction elements of machines and engineering assemblies	The student is able to determine the necessary manufacturing processes to produce a given mechanical element	[SU2] Assessment of ability to analyse information [SU3] Assessment of ability to use knowledge gained from the subject
	[K6_W16] has a knowledge of technologies for the manufacture of machine parts, is able to select the appropriate manufacturing process for a given mechanical component, has the ability to use tool catalogues to select tools and processing parameters	The student is able to choose the correct production process, technological machine and the type of tools for the implementation of the production process of a given element.	[SW1] Assessment of factual knowledge
Subject contents	<p>LECTURE Geometric and kinematic parameters of cutting. Tool and workpiece movements. The geometry of the blades in the tool and working system, the geometry of the cut layer. The phenomenon of chip formation and types of chips. Heat and temperature in the cutting zone. Cooling and lubricating agents. Wear of cutting tools. Cutting force and power. Tool materials and rules for their selection. Basic methods of machining: turning, milling, drilling, countersinking, reaming. Forming thermoplastics: extrusion and extrusion.</p> <p>LABORATORY Cutting materials and cutting-off machines. Machining on lathes. Machining on drills. Machining on milling machines. Machining of gears. Machining on grinders. Machining on planers and slotters. Forming thermoplastics: extrusion and extrusion.</p>		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Laboratory exercises	100.0%	20.0%
	Lecture	56.0%	80.0%
