

Subject card

Subject name and code	Management and Environmental Protection, PG_00055477								
Field of study	Mechatronics								
Date of commencement of studies	October 2023		Academic year of realisation of subject			2026/2027			
Education level	first-cycle studies		Subject group			Obligatory subject group in the field of study			
Mode of study	Full-time studies		Mode of delivery			at the university			
Year of study	4		Language of instruction			Polish			
Semester of study	7		ECTS credits			2.0			
Learning profile	general academic profile		Assessment form			assessment			
Conducting unit	Institute of Energy ->	Faculty of Med	hanical Engine	ering and Ship	Techno	ology			
Name and surname	Subject supervisor		dr inż. Blanka Jakubowska						
of lecturer (lecturers)	Teachers								
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Projec	t	Seminar	SUM	
	Number of study hours	15.0	0.0	15.0	0.0		0.0	30	
	E-learning hours included: 0.0								
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study		SUM	
	Number of study hours	30		1.0		19.0		50	
Subject objectives	The aim of this course is to make students familiarize with the notions: causes and effects of environmental degradation, processes of purification and restoration of environmental resources, and familiarization with the current legal status, models and concepts of environmental management and the structure of environmental management in Poland.								
Learning outcomes	Course out	Subi	Subject outcome			Method of verification			
	[K6_W12] has know management and kr essential for underst technical conditions activities; knows bas industrial safety and property rights; is abuse of patent database.			enows the concept of cental management I and the types of I protection ne student knows the ess of environmental sment and the afety and industrial nent. The student Illows the principles al health and safety.		[SW3] Assessment of knowledge contained in written work and projects			
	[K6_U10] is able - what formulating and solvi mechatronic enginee notice their systemwitechnical aspects	The student is able to analyze the operation of devices used in the processes of cleaning and restoration of environmental resources. The student connects economic, social and ecological issues with the issues of environmental protection.			[SU1] Assessment of task fulfilment				

Data wygenerowania: 11.04.2025 18:45 Strona 1 z 2

Subject contents	Lecture: Causes and effects of environmental degradation. Methods of purification and restoring environmental resources. The concept of sustainable development. Activities in the field of environmental protection. Industrial ecology. Models and definitions of environmental management and environmental management. Environmental management systems. Ecological and legal aspects of management systems. Best practices in technique and technologies. Primary and secondary methods for the elimination or reduction of emissions harmful to the environment. Laboratory: Various techniques of environmental engineering - sorting materials, mixing, separating pollutants. Economic issues related to the valuation of the use of the environment.						
Prerequisites and co-requisites	Fundamentals of physics, chemistry and fluid mechanics						
Assessment methods	Subject passing criteria	Passing threshold	Percentage of the final grade				
and criteria	lecture	56.0%	50.0%				
	laboratory	56.0%	50.0%
