

Subject card

Subject name and code	Construction and operation of mechatronic systems, PG_00055469						
Field of study	Mechatronics						
Date of commencement of studies	October 2023		Academic year of realisation of subject		2025/2026		
Education level	first-cycle studies		Subject group		Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	3		Language of instruction		Polish		
Semester of study	6		ECTS credits		3.0		
Learning profile	general academic profile		Assessment form		exam		
Conducting unit	Institute of Mechanics and Machine Design -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. inż. Ryszard Jasiński				
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	15.0	15.0	0.0	45
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	45		2.0		28.0	75
Subject objectives	The aim of the course is to acquaint students with the construction and operation of mechatronic systems.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_W11] has knowledge about the life cycle of mechatronic systems and objects		Student has a basic knowledge of the life cycle of mechatronic devices, facilities and systems. Student explains the structure and principle of operation of mechatronic systems.		[SW3] Assessment of knowledge contained in written work and projects		
	[K6_W10] has knowledge about development trends in the field of engineering and technology sciences and scientific disciplines: Mechanical Engineering, Automation, Electronics, Electrical Engineering and Space Technologies, adequate for Mechatronics course		Student has basic knowledge about development trends in the field of technical sciences and scientific disciplines: Construction and operation of machines, Mechanics appropriate for the field of Mechatronics studies. Student explains the structure and principle of operation of mechatronic systems.		[SW3] Assessment of knowledge contained in written work and projects		
	[K6_U08] is able - according to a given specification - design, calculate costs and develop a simple device, object, system or process typical for mechatronics, using appropriate methods, techniques and tools		Student designs manipulators of mechatronic systems.		[SU1] Assessment of task fulfilment [SU4] Assessment of ability to use methods and tools [SU5] Assessment of ability to present the results of task		
	[K6_U09] is able to formulate an algorithm, knows low and high level programming languages and appropriate IT tools for developing computer programmes to control mechatronic system		Student selects the basic elements (catalog) for the mechatronic system (actuators, sensors, control elements, drivers). Student designs manipulators of mechatronic systems. Student programs PLC controllers.		[SU1] Assessment of task fulfilment [SU3] Assessment of ability to use knowledge gained from the subject		

Subject contents	LectureConstruction of typical mechatronic systems. Functions of modules and elements of mechatronic systems. Principles of designing mechatronic systems that perform specific functions and meet given requirements. Basic calculations and rules for the selection of (catalog) elements for the mechatronic system (actuators, sensors, controls, drivers). Methods of assembling mechatronic elements (construction elements, connectors, cable routing, etc.). Principles of operation of mechatronic systems. Basics of programming the visualization of mechatronic system processes (SCADA). Laboratory PLC programming of the MAS-200 assembly system modules														
Prerequisites and co-requisites	Fundamentals of automationBasics of hydraulics and pneumaticsElements of mechatronic systemsModeling of mechatronic systemsMechatronic design														
Assessment methods and criteria	<table><tr><th>Subject passing criteria</th><th>Passing threshold</th><th>Percentage of the final grade</th></tr><tr><td></td><td>56.0%</td><td>40.0%</td></tr><tr><td></td><td>56.0%</td><td>30.0%</td></tr><tr><td></td><td>56.0%</td><td>30.0%</td></tr></table>			Subject passing criteria	Passing threshold	Percentage of the final grade		56.0%	40.0%		56.0%	30.0%		56.0%	30.0%
Subject passing criteria	Passing threshold	Percentage of the final grade													
	56.0%	40.0%													
	56.0%	30.0%													
	56.0%	30.0%
