

## SDAŃSK UNIVERSITY 的 OF TECHNOLOGY

## Subject card

Subject name and code	BSc Diploma Seminar, PG_00055502								
Field of study	Mechatronics								
Date of commencement of studies	October 2023		Academic year of realisation of subject			2026/2027			
Education level	first-cycle studies		Subject group		Optional subject group				
Mode of study	Full-time studies		Mode of delivery		at the university				
Year of study	4		Language of instruction			Polish			
Semester of study	7		ECTS credits			4.0			
Learning profile	general academic profile		Assessment form			assessment			
Conducting unit	Department of Mechanics and Mechatronics -> Faculty of Mechanical Engineering and Ship Technology						chnology		
Name and surname	Subject supervisor prof. dr hab. inż. Krzysztof Kaliński								
of lecturer (lecturers)	Teachers								
Lesson types and methods of instruction	Lesson type	son type Lecture		Laboratory Projec		t	Seminar	SUM	
	Number of study hours	0.0	0.0	0.0			15.0	15	
	E-learning hours included: 0.0					01114			
Learning activity and number of study hours	Learning activity	classes includ	ed in study	Participation in consultation hours		Self-study		SUM	
	Number of study hours	15		34.0				100	
Subject objectives	Acquiring knowledge on diploma engineer project elaboration, and preparing, explaining and discussing on the thesis.								
Learning outcomes	Course outcome			Subject outcome			Method of verification		
	[Ko_UU2] IS able to elaborate on specific mechatronic topics as well as topics from engineering and technology sciences and disciplines such as Mechanical Engineering, Automation, Electronics, Electrical Engineering and Space Technologies		Student prepares and presents his thesis at he seminar			present the results of task			
	[K6_U01] is able to acquire information from literature, databases and other, properly chosen sources, integrate these information, interpret them, draw conclusions and formulate opinions		Student developing his engeenering thesis uses aproppriate databases, evaluates and synthesies information			[SU2] Assessment of ability to analyse information			
	[K6_U03] has self-learning skills		Student developing his engeenering thesis recognieses the need of self-education			[SU2] Assessment of ability to analyse information			
Subject contents	Regulations and rules for implementing theses, including rules editing work and how to use the literature (scientific, technical, patent, etc.). Presentation of assumptions, analysis of substantive tasks each student's thesis. Individual presentation of work of each student. Critical analysis of the solutions, discussion and defense of views by all participants of the seminar.								
Prerequisites and co-requisites	Given task of the engineering thesis.								
Assessment methods and criteria	Subject passing criteria		Passing threshold			Percentage of the final grade			
	Activity during the seminar		0.0%			25.0%			
	Presence on the seminar		100.0%			0.0%			
	Presentation		100.0% [75.0%						
Recommended reading	Basic literature		I ne literature on the principles of writing diploma theses						
	eResources addresses					iu scope of the uploma thesis.			
	Citesources addresses		Auresy na platformie einauczanie:						

Example issues/ example questions/ tasks being completed	Not applicable
Work placement	Not applicable
