

Subject card

Subject name and code	Diploma Seminar, PG_00060566						
Field of study	Naval Architecture and Offshore Structures						
Date of commencement of studies	October 2023	Academic year of realisation of subject			2026/2027		
Education level	first-cycle studies	Subject group			Optional subject group		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	4	Language of instruction			Polish		
Semester of study	7	ECTS credits			4.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Zakład Siłowni Okrętowych -> Institute of Ocean Engineering and Ship Technology -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor	prof. dr hab. inż. Zbigniew Korczewski					
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	0.0	0.0	30.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study	SUM	
	Number of study hours	30	3.0		67.0	100	
Subject objectives	Acquiring the ability to prepare and present a diploma thesis						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K6_U02] can work individually and in a team, communicate through various techniques in professional environment and also record, analyse, and present the results of work, can estimate the time needed to complete a given task	Student can develop and present engineering report in the field of construction and operation of ships and marine equipment			[SU5] Assessment of ability to present the results of task		
	[K6_U01] can obtain information from literature, databases and other sources, can verify and organize the obtained information, interpret them and form conclusions and justified opinions	Student follows professional literature and applies the acquired knowledge in practice enriching possessed skills and engineering experience this way.			[SU4] Assessment of ability to use methods and tools		
	[K6_K01] is aware of the need of constant improvement within the range of the possessed job and knows the possibilities of further education	Student understands the need to constantly improve his knowledge and engineering skills to keep up with the dynamic global development of technique and technology in the field of construction and operation of ships and marine equipment.			[SK2] Assessment of progress of work		
Subject contents	Acquainting students with the form of writing a thesis and preparing a presentation. Each student presents the next stages of their diploma thesis during the class. The presented content, both descriptive and in the form of drawing documentation and calculations, is the subject of discussion and preliminary assessment. This allows you to improve your skills in presenting technical issues, and also allows you to correct any errors and shortcomings on an ongoing basis						
Prerequisites and co-requisites	Knowledge and skills in the field of subjects taught in the field of study and specialization.						
Assessment methods and criteria	Subject passing criteria	Passing threshold			Percentage of the final grade		
		60.0%			100.0%		
Recommended reading	Basic literature	Literature selected for the subject of the diploma thesis					
	Supplementary literature	Supplementary literature on the methodology of writing diploma theses.					
	eResources addresses	Adresy na platformie eNauczanie:					

Example issues/ example questions/ tasks being completed	
Work placement	Not applicable
