

Subject card

Subject name and code	Data Analysis and Presentation, PG_00060640						
Field of study	Transport and Logistics						
Date of commencement of studies	October 2023	Academic year of realisation of subject			2023/2024		
Education level	first-cycle studies	Subject group			Obligatory subject group in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	1	Language of instruction			Polish		
Semester of study	2	ECTS credits			2.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Division of Applied Computer Science -> Institute of Naval Architecture -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Marcin Życzkowski				
	Teachers		dr inż. Marcin Życzkowski dr inż. Patrycja Puzdrowska				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	0.0	15.0	0.0	30
E-learning hours included: 0.0							
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		4.0		16.0	50
Subject objectives	The student became familiar with IT tools that will allow him to visualize data in a clear and attractive way for the recipient.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_U05] can formulate a simple engineering task and its specification in the field of design, maintenance and operation of transport means and systems		The student, having basic knowledge of Transport and Logistics, performs analysis using tools from the Python libraries and is able to diagnose problems.		[SU5] Assessment of ability to present the results of task [SU4] Assessment of ability to use methods and tools		
	[K6_U02] can work individually and in a team, communicate using various techniques in a professional environment, as well as document, analyze and present the results of his work; can estimate the time needed to complete a given task		The student is able to make the appropriate selection of IT tools so that the loaded data can first be cleaned, filtered and prepared for further work in visualization and analysis in the Python environment.		[SU1] Assessment of task fulfilment [SU2] Assessment of ability to analyse information [SU4] Assessment of ability to use methods and tools		
	[K6_W04] has well established knowledge in the field of computer science, electronics, automation and control, information technology and computer graphics, useful for understanding the possibilities of applying them in transport		The student is able to independently visualize data from a file using specialized tools from appropriate Python libraries		[SW3] Assessment of knowledge contained in written work and projects		

Subject contents	<p>The student will become familiar with the Pandas, Seaborn, Numpy, and Matplotlib libraries.</p> <p>Pandas is a library that makes it easy to load, transform, explore, and analyze tabular data such as spreadsheets or databases.</p> <p>The student will learn the basic structures from this library: Series, DataFrame.</p> <p>The student will be able to load and save data from various sources, such as CSV files, Excel, SQL, JSON and many others. You can also save data to these formats. He will be able to select and index data. It will perform operations on the data such as filtering, sorting, grouping, combining and many others.</p> <p>The student will also learn the Seaborn and Matplotlib libraries and will make various types of plots, including scatter plots, histograms, heat maps, boxplots and others.</p> <p>The student will also learn about the Numpy library.</p> <p>It will also use various types of statistical functions and mathematical operations.</p>											
Prerequisites and co-requisites	The student knows the basics of Python programming											
Assessment methods and criteria	<table border="1" data-bbox="451 553 1477 654"> <thead> <tr> <th data-bbox="451 553 794 586">Subject passing criteria</th> <th data-bbox="794 553 1137 586">Passing threshold</th> <th data-bbox="1137 553 1477 586">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td data-bbox="451 586 794 620"></td> <td data-bbox="794 586 1137 620">50.0%</td> <td data-bbox="1137 586 1477 620">20.0%</td> </tr> <tr> <td data-bbox="451 620 794 654"></td> <td data-bbox="794 620 1137 654">50.0%</td> <td data-bbox="1137 620 1477 654">80.0%</td> </tr> </tbody> </table>			Subject passing criteria	Passing threshold	Percentage of the final grade		50.0%	20.0%		50.0%	80.0%
Subject passing criteria	Passing threshold	Percentage of the final grade										
	50.0%	20.0%										
	50.0%	80.0%
