

Subject card

Subject name and code		Electrotechnics and Electronics in Transport, PG_00060645						
Field of study		Transport and Logistics						
Date of commencement of studies		October 2023	Academic year of realisation of subject			2024/2025		
Education level		first-cycle studies	Subject group			Obligatory subject group in the field of study		
Mode of study		Full-time studies	Mode of delivery			at the university		
Year of study		2	Language of instruction			Polish		
Semester of study		3	ECTS credits			3.0		
Learning profile		general academic profile	Assessment form			assessment		
Conducting unit		Division of Marine Auxiliary Machinery -> Institute of Naval Architecture -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)		Subject supervisor		dr inż. Wojciech Leśniewski				
		Teachers		dr inż. Magdalena Kunicka dr inż. Wojciech Leśniewski dr inż. Konrad Marszałkowski				
Lesson types and methods of instruction		Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
		Number of study hours	30.0	15.0	0.0	0.0	0.0	45
		E-learning hours included: 0.0						
Learning activity and number of study hours		Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study	SUM	
		Number of study hours	45	4.0		26.0	75	
Subject objectives		Familiarize students with the basics of electrical engineering and electronics						
Learning outcomes		Course outcome		Subject outcome		Method of verification		
		[K6_W03] has well structured knowledge of hydromechanics, thermodynamics, machine construction, ecology, material science and electrical engineering necessary to understand the principles of construction and operation of means of water transport		Has knowledge in the field of electrical engineering and electronics and is able to use it as part of analytical and design tasks related to ocean technical issues		[SW3] Assessment of knowledge contained in written work and projects [SW1] Assessment of factual knowledge		
		[K6_K01] is aware of the need for continuous improvement in the field of the profession and knows the possibilities of further education		The student is able to notice shortcomings knowledge in a specific field i can complete them		[SK5] Assessment of ability to solve problems that arise in practice		
Subject contents		<ul style="list-style-type: none"> • Electric current, sources of electricity, basics of electrical circuits. • Magnetic field and electromagnetism. • Sources of electricity 1. • AC circuits, power in AC systems. • Sources of electricity 2 • Control systems in electrical engineering and electronics. • Ship energy systems and electrical installations. • Electronic Components I • Electric drives of ships and floating objects. • Electronic components II • Measurements of non-electrical quantities and long-distance signal transmission. • Classification regulations in shipbuilding: • Electrical installations and control systems. • Basics of radio technology 						

Prerequisites and co-requisites	The knowledge of mathematics and physics of university level		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
		50.0%	50.0%
		50.0%	50.0%
Recommended reading	Basic literature		
	Supplementary literature		
	eResources addresses	Adresy na platformie eNauczanie: Elektrotechnika i elektronika w transporcie (PG_00060645) - Moodle ID: 41664 https://enauczanie.pg.edu.pl/moodle/course/view.php?id=41664	
Example issues/ example questions/ tasks being completed	Description and solution electrical circuits. in the time domain and symbolic method. Impedance replacement of electrical circuits. Resonances in the electrical circuits Magnetic circuits - solving systems.		
Work placement	Not applicable		

Document generated electronically. Does not require a seal or signature.
