

Subject card

Subject name and code	Cargo Stowing, Lashing and Securing, PG_00060650						
Field of study	Transport and Logistics						
Date of commencement of studies	October 2023	Academic year of realisation of subject			2024/2025		
Education level	first-cycle studies	Subject group			Obligatory subject group in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	2	Language of instruction			Polish		
Semester of study	4	ECTS credits			2.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Zakład Wyposażenia Okrętu -> Institute of Ocean Engineering and Ship Technology -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor	dr inż. Daniel Piątek					
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	15.0	0.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study		SUM
	Number of study hours	30	2.0		18.0		50
Subject objectives	Principles of securing loads and the impact of securing loads on the operation of means of transport						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K6_W05] has established knowledge in the field of design, construction and operation of transport means and systems	The student knows the impact of proper load securing on the functioning of means of transport			[SW1] Assessment of factual knowledge [SW3] Assessment of knowledge contained in written work and projects		
	[K6_U05] can formulate a simple engineering task and its specification in the field of design, maintenance and operation of transport means and systems	The student is able to estimate the forces resulting from the impact of the load and is able to select the necessary fastening equipment			[SU1] Assessment of task fulfilment [SU3] Assessment of ability to use knowledge gained from the subject		
	[K6_K03] understands non-technical aspects and effects of activity in the profession of an engineer and its impact on the environment; is aware of the responsibility for decisions made	The student is able to determine the impact of proper load securing on the environment and transport safety			[SK5] Assessment of ability to solve problems that arise in practice		
Subject contents	- fastening materials and techniques; - forming a container cargo unit; - loading techniques and equipment; - dynamic impacts in transport; - ship stability; - examples of securing typical cargo groups;						
Prerequisites and co-requisites							
Assessment methods and criteria	Subject passing criteria	Passing threshold			Percentage of the final grade		
	exercises - colloquium	60.0%			50.0%		
	lecture - colloquium	60.0%			50.0%
