

Subject card

Subject name and code	SCORING MODELS, PG_00060758						
Field of study	Economic Analytics						
Date of commencement of studies	October 2023		Academic year of realisation of subject		2024/2025		
Education level	second-cycle studies		Subject group		Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Part-time studies		Mode of delivery		at the university		
Year of study	2		Language of instruction		Polish		
Semester of study	4		ECTS credits		3.0		
Learning profile	general academic profile		Assessment form		exam		
Conducting unit	Department of Statistics and Econometrics -> Faculty of Management and Economics						
Name and surname of lecturer (lecturers)	Subject supervisor		dr Błażej Kochański				
	Teachers		dr Błażej Kochański				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	8.0	0.0	16.0	0.0	0.0	24
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	24		4.0		47.0	75
Subject objectives	Assesses the credibility of the bank's client, reducing the risk by using scoring models						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K7_W06] identifies reliable sources of information relevant to the analyzed issues		identify reliable sources of information for the purposes of assessing the customer's creditworthiness by banks and reducing the bank's risk		[SW1] Assessment of factual knowledge		
	[K7_U04] prepares and presents convincing, professional presentations of analysis results, with their in-depth interpretation		presents a professional presentation of the results of scoring analyses, making an in-depth interpretation of the proposed ratings		[SU5] Assessment of ability to present the results of task		
Subject contents	The concept of credit scoring, scoring card, creditworthiness, creditworthiness, risk assessment Typology of bank credit scoring models Data used in credit models, credit information bureaus Selection of variables, clustering (binning), missing data Problems: good/bad customer, default, loss Construction of scoring models - statistical tools and machine learning methods Reject inference method Use of logistic regression in credit risk assessment Use of classification trees uality assessment of scoring models - confusion table, ROC curve, Gini coefficient, KS, lift Calibration of scoring models Use of scoring. Setting cut-off points, risk-based pricing Scoring model construction and implementation process, validation and monitoring Development of bank scoring models - latest trends						
Prerequisites and co-requisites							
Assessment methods and criteria	Subject passing criteria		Passing threshold		Percentage of the final grade		
	Test		60.0%		30.0%		
	Exam		60.0%		70.0%
