

Subject card

Subject name and code	SCORING MODELS, PG_00060758								
Field of study	Economic Analytics								
Date of commencement of studies	October 2023		Academic year of realisation of subject			2024/2025			
Education level	second-cycle studies		Subject group			Optional subject group Subject group related to scientific research in the field of study			
Mode of study	Part-time studies		Mode of delivery			at the university			
Year of study	2		Language of instruction			Polish			
Semester of study	4		ECTS credits			3.0			
Learning profile	general academic profile		Assessment form			exam			
Conducting unit	Department of Statistics and Econometrics -> Faculty of Management and Economics								
Name and surname	Subject supervisor		dr Błażej Kochański						
of lecturer (lecturers)	Teachers		dr Błażej Koc						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Projec	:t	Seminar	SUM	
	Number of study hours	8.0	0.0	16.0	0.0	0.0		24	
	E-learning hours inclu			<u> </u>		l		1	
Learning activity and number of study hours	Learning activity	Participation in classes include plan		Participation in consultation hours		Self-study		SUM	
	Number of study hours 24		4.0		47.0 75				
Subject objectives	Assesses the credibility of the bank's client, reducing the risk by using scoring models								
Learning outcomes	Course out	come	Subject outcome			Method of verification			
	[K7_W06] identifies reliable sources of information relevant to the analyzed issues					[SW1] Assessment of factual knowledge			
	[K7_U04] prepares and presents convincing, professional presentations of analysis results, with their in-depth interpretation		presents a professional presentation of the results of scoring analyses, making an indepth interpretation of the proposed ratings			[SU5] Assessment of ability to present the results of task			
Subject contents	The concept of credit scoring, scoring card, creditworthiness, creditworthiness, risk assessment Typology of bank credit scoring models Data used in credit models, credit information bureaus Selection of variables, clustering (binning), missing data Problems: good/bad customer, default, loss Construction of scoring models - statistical tools and machine learning methods Reject inference method Use of logistic regression in credit risk assessment Use of classification trees uality assessment of scoring models - confusion table, ROC curve, Gini coefficient, KS, lift Calibration of scoring models Use of scoring. Setting cut-off points, risk-based pricing Scoring model construction and implementation process, validation and monitoring Development of bank scoring models - latest trends								
Prerequisites and co-requisites									
Assessment methods and criteria	Subject passing criteria		Passing threshold		Percentage of the final grade				
	Test		60.0%		30.0%				
	Exam	60.0%			70.0%
