

## Subject card

|   |   |   |                                     |            |  |         |     |
|---|---|---|-------------------------------------|------------|--|---------|-----|
| Subject name and code                       | Deck Equipment 1, PG_00045057   |   |                                     |            |  |         |     |
| Field of study                              | Ocean Engineering   |   |                                     |            |  |         |     |
| Date of commencement of studies             | October 2022  | Academic year of realisation of subject   |                                     |            | 2023/2024  |         |     |
| Education level                             | first-cycle studies   | Subject group   |                                     |            |  |         |     |
| Mode of study                               | Full-time studies   | Mode of delivery  |                                     |            | at the university  |         |     |
| Year of study                               | 2   | Language of instruction   |                                     |            | Polish   |         |     |
| Semester of study                           | 4   | ECTS credits  |                                     |            | 3.0  |         |     |
| Learning profile                            | general academic profile  | Assessment form   |                                     |            | assessment   |         |     |
| Conducting unit                             | Faculty of Ocean Engineering and Ship Technology  |   |                                     |            |  |         |     |
| Name and surname of lecturer (lecturers)    | Subject supervisor  | dr inż. Agnieszka Maczyszyn   |                                     |            |  |         |     |
|   | Teachers  | dr inż. Agnieszka Maczyszyn   |                                     |            |  |         |     |
| Lesson types and methods of instruction     | Lesson type   | Lecture   | Tutorial                            | Laboratory | Project  | Seminar | SUM |
|   | Number of study hours   | 30.0  | 0.0                                 | 15.0       | 0.0  | 0.0     | 45  |
|   | E-learning hours included: 0.0  |   |                                     |            |  |         |     |
| Learning activity and number of study hours | Learning activity   | Participation in didactic classes included in study plan  | Participation in consultation hours |            | Self-study   | SUM     |     |
|   | Number of study hours   | 45  | 5.0                                 |            | 25.0   | 75      |     |
| Subject objectives                          | Familiarize students with the basic systems in which the ship is equipped.<br>Learn the functions and principles of operation of the basic ship's equipment and systems in accordance with the requirements of the provisions of classification societies and applicable standards. |   |                                     |            |  |         |     |
| Learning outcomes                           | Course outcome  | Subject outcome   |                                     |            | Method of verification   |         |     |
|   | [K6_U05] can formulate a simple engineering task and its specification within the range of design, construction and operation of ocean technology objects and systems   | The student can appoint, describe the construction and principle of operation of on-board equipment |                                     |            | [SU3] Assessment of ability to use knowledge gained from the subject |         |     |
|   | [K6_U03] can use computer-aided design, production and operation tools for ocean technology objects and systems   | Student is able to identify basic systems of on-board equipment.                                    |                                     |            | [SU3] Assessment of ability to use knowledge gained from the subject |         |     |
|   | [K6_W06] has an organized knowledge on engineering methods and design tools allowing the conducting of projects within the construction and operation of ocean technology objects and systems   | Knowledge of the functions of basic ship equipment and systems                                      |                                     |            | [SW3] Assessment of knowledge contained in written work and projects |         |     |
| Subject contents                            | Lecture:  |   |                                     |            |  |         |     |
|   | 1. Anchor-mooring system;<br>2. Steering system;<br>3. Ship-wide installation system;<br>4. Fire protection system;<br>5. Ship loading and unloading system;  |   |                                     |            |  |         |     |
|   | Laboratory  |   |                                     |            |  |         |     |
| Prerequisites and co-requisites             | Machine design basics<br>Technology of parts of machines and ship equipment   |   |                                     |            |  |         |     |
| Assessment methods and criteria             | Subject passing criteria  | Passing threshold   |                                     |            | Percentage of the final grade  |         |     |
|   | Laboratories - reports  | 55.0%   |                                     |            | 40.0%  |         |     |
|   | Lecture -2 colloquium   | 55.0%   |                                     |            | 60.0%  |         |     |

|  |                          |   |
