

Subject card

Subject name and code	BIG DATA , PG_00061093						
Field of study	Economic Analytics						
Date of commencement of studies	October 2023		Academic year of realisation of subject		2024/2025		
Education level	second-cycle studies		Subject group		Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	2		Language of instruction		English		
Semester of study	3		ECTS credits		4.0		
Learning profile	general academic profile		Assessment form		exam		
Conducting unit	Katedra Statystyki i Ekonometrii -> Faculty of Management and Economics						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. Michał Pietrzak				
	Teachers		dr hab. Michał Pietrzak				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	45.0	0.0	0.0	60
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	60		8.0		32.0	100
Subject objectives	Demonstrates in-depth comprehensive preparation for the analysis of large data sets						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K7_W03] demonstrates in-depth preparation in the application of analytical methods and techniques for formulating and solving problems		uses advanced technologies to handle large data sets, preparing them to solve complex problems		[SW1] Assessment of factual knowledge		
	[K7_U01] creates innovative solutions to complex and unstructured problems, taking into account the variability of the environment by synthesising information from many sources		formulates innovative solutions based on large data sets using in-depth machine learning algorithms		[SU3] Assessment of ability to use knowledge gained from the subject		
Subject contents	Overview of Big Data. Types of Digital Data, Introduction to Big Data Big data programming tools (e.g., Hadoop, MongoDB, Spark, etc.). Using Spark with R Big data extraction and integration Big data storage; Technologies for Handling Big Data Introduction to Hadoop HDFS (Hadoop Distributed File System) Dig Deep to understand the fundamental of MapReduce and HBase Hadoop MapReduce in R; Integrating Hadoop and R RHIPE; RHadoop Data Analytics with R and Hadoop data preprocessing, visualising data Big Data Analysis and Machine Learning supervised and unsupervised ML algorithms. Spark Machine Learning with R Importing and exporting data from various DBs (RMySQL, RSQLite, RHive, RHBase). Using SparkSQL with R Big Data Analytics with BigR Deep learning algorithms with R & H2O						
Prerequisites and co-requisites							
Assessment methods and criteria	Subject passing criteria		Passing threshold		Percentage of the final grade		
	Test		60.0%		40.0%		
	Exam		60.0%		60.0%
