GDAŃSK UNIVERSITY OF TECHNOLOGY

Subject card

Subject name and code	INFORMATION AND KNOWLEDGE MANAGEMENT, PG_00061110		
Field of study	Management		
Date of commencement of studies	October 2023	Academic year of realisation of subject	2024/2025
Education level	second-cycle studies	Subject group	Obligatory subject group in the field of study Subject group related to scientific research in the field of study
Mode of study	Full-time studies	Mode of delivery	at the university
Year of study	2	Language of instruction	English
Semester of study	3	ECTS credits	3.0
Learning profile	general academic profile	Assessment form	exam
Conducting unit	Department of Management -> Faculty of Management and Economics		
Name and surname of lecturer (lecturers)	Subject supervisor	prof. dr hab. inż. Edward Szczerbicki	
	Teachers	prof. dr hab. inż. Edward Szczerbicki	

Lesson types and methods of instruction

Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
Number of study hours	30.0	0.0	0.0	0.0	0.0	30

E-learning hours included: 0.0

Learning activity and number of study hours

Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM
Number of study hours	30	5.0	40.0	75

Subject objectives

Uses modern trends in the field of information and knowledge management and engineering in the era of knowledge-based intelligent systems and the semantic society

Learning outcomes

Course outcome	Subject outcome	Method of verification
[K7_U03] formulates research problems and selects appropriate analytical methods for their effective solution, using advanced IT tools, and evaluates the results critically	formulates research problems in the area of knowledge management choosing appropriate methods of solving them	[SU4] Assessment of ability to use methods and tools
[K7_W02] explains the meaning and interdependence of the key components describing economic processes, using in-depth knowledge consistent with the main trends in the development of scientific disciplines related to the field of study	explains the importance and interdependencies between the key factors of the modern concept of management based on knowledge and information	[SW1] Assessment of factual knowledge

Subject contents

Contemporary intelligent systems based on knowledge
The importance of experience in the formalization and representation of information and knowledge
Methods and techniques of artificial intelligence (AI) in modern intelligent decision support systems
Knowledge as a resource and its role in the semantic socjety
Knowledge representation
Management and knowledge engineering
The concept of experience collection (SOE) and decision DNA (DDNA)
Representation of knowledge through a set of experiences
Ontologies and semantic web
Trust and security and its role and importance in intelligent systems
e-Decision community concept
Challenges of the upcoming fourth industrial revolution (Industry 4.0) and the Internet of Things (IoT) in the area of intelligent management and information and knowledge engineering

Prerequisites and co-requisites

Assessment methods and criteria

Subject passing criteria	Passing threshold	Percentage of the final grade
Oral exam	50.0%	100.0%
