

Subject card

Subject name and code	Advanced materials technologies , PG_00058895						
Field of study	Mechanical Engineering						
Date of commencement of studies	February 2023		Academic year of realisation of subject		2023/2024		
Education level	second-cycle studies		Subject group				
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	2		Language of instruction		English		
Semester of study	3		ECTS credits		4.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Zakład Materiałów Funkcjonalnych -> Institute of Manufacturing and Materials Technology -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor		prof. dr hab. inż. Dionizy Czekaj				
	Teachers		prof. dr hab. inż. Dionizy Czekaj				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	0.0	0.0	15.0	0.0	45
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	45		0.0		0.0	45
Subject objectives	To explain students key issues in the field of Materials Science and Materials Engineering						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K7_U01] is able to acquire information from specialist literary sources and other sources regarding the construction and operation of machines and related disciplines in polish and in a foreign language, is able to conduct a self-learning process, is able to synthesize the information, form conclusions and justify opinions		The student is able to use scientific databases, retrieve relevant information and critically analyze their suitability for the implementation of a selected engineering problem. The student understands the need to improve professional competences.		[SU2] Assessment of ability to analyse information		
	[K7_W06] possesses organized, profound knowledge necessary for designing and optimization of complex technological processes, modelling and calculations using numerical methods, knows modern manufacturing methods and tools for designing manufacturing processes of machines, devices, their elements and components		The student has the knowledge necessary to design complex technological processes, knows modern methods of manufacturing engineering materials		[SW1] Assessment of factual knowledge		
	[K7_W11] possesses organized knowledge useful in understanding ex-technical conditioning connected with performing the profession of an engineer and taking it into consideration in engineering practice; possesses well-established knowledge within the range of intellectual property, management and organization of manufacturing processes, including the management and life-cycle of a product		The student has knowledge useful to understand non-technical conditions related to the profession of an engineer.		[SW1] Assessment of factual knowledge		

Subject contents	1. Introduction to Materials and Processes in Manufacturing 2. Properties of Materials 3. Material Selection 4.Nontraditional Manufacturing Processes 5. Micro/Meso/Nano Fabrication Processes		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Project Report	100.0%	50.0%
	Colloquium (written paper)	51.0%	50.0%
