| | 2. Wear of the machinery components and monitoring of oil. | | | | | | |
| | 3. Preparation of the hydraulic system to operate. | | | | | | |
| | Methods for determining of pressure losses in the internal channels of pump and hydraulic and pneumatic motor. | | | | | | |
| | 5. Determination of the theoretical of | retical displacement of hydraulic and pneumatic machine. | | | | | |
| | Methods of testing the motor and the pump at a constant low speed. Starting torque. | | | | | | |
| | Methods of description of the losses in hydraulic and pneumatic motors. Methods of testing of the hydraulic and pneumatic systemscomponents at low ambient temperatures. Methodology of the testing of the seals in the reciprocating and rotary motion. Methods of dewatering oil. Methods for determining the amount of water in oil. Method of the thermal monitoring and diagnosis of hydraulic devices. | | | | | | |
