

## Subject card

Subject name and code	Yacht Construction in practice 1, PG_00059285						
Field of study	Design and Construction of Yachts						
Date of commencement of studies	October 2022		Academic year of realisation of subject		2023/2024		
Education level	first-cycle studies		Subject group				
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	2		Language of instruction		Polish		
Semester of study	3		ECTS credits		5.0		
Learning profile	practical profile		Assessment form		assessment		
Conducting unit	Institute of Ocean Engineering and Ship Technology -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor		mgr inż. Jacek Frost				
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	30.0	0.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		0.0		95.0	125
Subject objectives	The aim of the course is to familiarize students with the functioning of the enterprise. Getting to know the structure of the company. Getting to know the production process of watercrafts. Participation in all stages of yacht construction.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	K6_K01		The student is aware of the continuous development in the field of the profession, knows the paths of development		[SK1] Assessment of group work skills [SK3] Assessment of ability to organize work		
	K6_U04		has the ability to self-study in order to develop their professional qualifications, is prepared to work in an industrial environment, applies the principles of occupational health and safety		[SU4] Assessment of ability to use methods and tools [SU3] Assessment of ability to use knowledge gained from the subject		
	K6_K03		understands the non-technical aspects and effects of activity in the engineering profession, its impact on the environment and is aware of the responsibility for decisions made		[SK5] Assessment of ability to solve problems that arise in practice [SK4] Assessment of communication skills, including language correctness		
	K6_U06		is able to perform a simple engineering task in the field of designing, manufacturing and operating yachts in accordance with the formulated specification, using appropriate methods and tools		[SU5] Assessment of ability to present the results of task [SU4] Assessment of ability to use methods and tools		
Subject contents	Implementation of the internship in an enterprise in the amount of 120 hours, settlement of the internship, preparation of a report.						
Prerequisites and co-requisites	Completed 1 year of studies						
Assessment methods and criteria	Subject passing criteria		Passing threshold		Percentage of the final grade		
	Practice implementation report		60.0%		100.0%		
Recommended reading	Basic literature		not applicable				
	Supplementary literature		not applicable				
	eResources addresses		Adresy na platformie eNauczanie:				

Example issues/ example questions/ tasks being completed	not applicable
Work placement	Not applicable
