

Subject card

Subject name and code	Diploma seminar II , PG_00049270						
Field of study	Spatial Development						
Date of commencement of studies	October 2023		Academic year of realisation of subject		2026/2027		
Education level	first-cycle studies		Subject group		Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	4		Language of instruction		Polish		
Semester of study	7		ECTS credits		2.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Department of Urban Design and Regional Planning -> Faculty of Architecture -> Faculties of Gdańsk University of Technology						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. arch. Małgorzata Kostrzewska				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	0.0	0.0	30.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		2.0		18.0	50
Subject objectives	The aim of the course is to present practical examples of shaping urban space, especially public spaces, and urban regeneration. The seminar will be carried out in the form of a study trip to Łódź and Warsaw and meetings with designers, experts and representatives of institutions, offices and NGOs.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_W06] has knowledge of the structures and organizations involved in the space management process, knows the principles and legal basis of their operation and has a basic knowledge of the relationships between structures and social institutions on a local, regional, national and international scale, as well as on intercultural relations		Knowledge of the functioning of various entities responsible for shaping urban spaces and the effects of their activities. Ability to indicate the competences and tasks of the public side (planning departments, departments responsible for orders and supervision of urban design).		[SW2] Assessment of knowledge contained in presentation		
	[K6_W08] has a basic knowledge of the role of planner and urban planner, knowledge of intellectual property protection and the application of copyright law, knows the rules in the profession of planner and urban planner		Knowledge of the role of an urban planner in various planning processes, i.e. pre-planning processes from the perspective of the developer and the institutions responsible for public planning.		[SW2] Assessment of knowledge contained in presentation		

Subject contents	Course content – seminar The diploma seminar is organized in the form of a study trip and its summary. During the summary, the projects presented during the trip will be presented and the main planning and organizational aspects related to the topic of the trip will be discussed. Methodically, the seminar prepares students to use tools such as case studies to conduct design, research and scientific work.													
	Study trip The aim of the trip will be to show different approaches to shaping new complexes of multi-functional buildings and public spaces. The main topic of the trip is the issue of recovering urban spaces through revitalization projects implemented in the existing urban tissue, taking into account existing historical resources or through the expansion of new housing complexes. We will look at projects that result in the construction of new parts of the city - mixed-use buildings, shopping centers and apartment buildings, as well as public utilities. Public spaces will be an important point of the program. The trip will be organized to two cities: Warsaw and Łódź. These cities differ in their history. Łódź was affected by the negative effects of the political transformation, but has been undergoing revitalization over the last decade. Its elements included activities of the public side, private investors and NGOs. The trip will present each of these aspects through case studies and conversations with designers responsible for these projects. Warsaw is the main city of Poland, the only true metropolis. Taking a look at the projects being implemented will allow us to see how the capital's most dynamic real estate market and the actions of the Warsaw authorities have responded to the capital's development challenges. In Warsaw, we will look at both modern projects on the left bank of the Vistula in the office heart of Wola, as well as projects in the revitalized part of Praga. However, the main topic will be large mixed-use projects built by private investors. Summary meeting During the meeting, the projects presented during the trip will be summarized. The meeting is a seminar. Its result is that the participants provide a short text summary, which will ultimately also be included in Master's theses.													
	Prerequisites and co-requisites The course is an integral part of the diploma process at the Master degree stage. To participate in the course, one must have an engineering diploma in spatial management or a related field.													
	Assessment methods and criteria <table><tr><td>Subject passing criteria</td><td>Passing threshold</td><td>Percentage of the final grade</td></tr><tr><td></td><td>50.0%</td><td>50.0%</td></tr><tr><td></td><td>10.0%</td><td>10.0%</td></tr><tr><td></td><td>40.0%</td><td>40.0%</td></tr></table>			Subject passing criteria	Passing threshold	Percentage of the final grade		50.0%	50.0%		10.0%	10.0%		40.0%
Subject passing criteria	Passing threshold	Percentage of the final grade												
	50.0%	50.0%												
	10.0%	10.0%												
	40.0%	40.0%												
Recommended reading	Basic literature	The seminar is based on case studies. To supplement the knowledge acquired during the study trip, students will use publicly available Internet sources - websites of design offices and institutions as well as industry press.												
	Supplementary literature	Not applicable.												
	eResources addresses													
Example issues/ example questions/ tasks being completed	Describe the projects presented during the study visit, the origins, description of the main, leading coordinator and contractor and the consequences of their actions. Indicate the role and tasks of an urban planner and urban design in preparing public space designs. Indicate the role and tasks of a private investor in preparing urban projects. Indicate the role of the public side in the implementation of urban projects.													
Practical activities within the subject	Not applicable
