

## Subject card

| Subject name and code  | Electrical Installations, PG_00055886   |  |  |                                     |  |  |           |     |  |
|--|---|--|--|-------------------------------------|--|--|-----------|-----|--|
| Field of study   | Power Engineering, Power Engineering, Power Engineering   |  |  |                                     |  |  |           |     |  |
| Date of commencement of  | October 2023  | g. 0 0   |  |                                     | 2024/2025  |  |           |     |  |
| studies  | October 2023  |  | Academic year of realisation of subject                      |                                     |  | 2024/  | 2024/2025 |     |  |
| Education level  | first-cycle studies   |  | Subject group  |                                     |  | Obligatory subject group in the field of study                       |           |     |  |
|  |   |  |  |                                     |  | Subject group related to scientific research in the field of study   |           |     |  |
| Mode of study  | Full-time studies   |  | Mode of delivery   |                                     |  | at the university  |           |     |  |
| Year of study  | 2   |  | Language of instruction                                      |                                     |  | Polish   |           |     |  |
| Semester of study  | 3   |  | ECTS credits   |                                     |  | 3.0  |           |     |  |
| Learning profile   | general academic profile  |  | Assessment form  |                                     |  | assessment   |           |     |  |
| Conducting unit  | Department of Electri   | neering -> Faculty of Electrical and Control Engineering   |  |                                     |  |  |           |     |  |
| Name and surname   | Subject supervisor  | prof. dr hab. inż. Zbigniew Lubośny  |  |                                     |  |  |           |     |  |
| of lecturer (lecturers)  | Teachers  |  |  |                                     |  |  |           |     |  |
| Lesson types and methods of instruction  | Lesson type   | Lecture  | Tutorial   | Laboratory                          | Projec   | t  | Seminar   | SUM |  |
|  | Number of study hours   | 15.0   | 0.0  | 0.0                                 | 15.0   |  | 0.0       | 30  |  |
|  | E-learning hours included: 0.0  |  |  |                                     |  |  |           |     |  |
| Learning activity and number of study hours  | Learning activity   | Participation in didactic classes included in study plan   |  | Participation in consultation hours |  | Self-study   |           | SUM |  |
|  | Number of study hours   | umber of study 30  |  | 8.0                                 |  | 37.0   |           | 75  |  |
| Subject objectives   | Acquainting with the construction and principles of selection of elements of electrical installations.  |  |  |                                     |  |  |           |     |  |
| Learning outcomes  | Course out  | come   | Subject outcome  |                                     |  | Method of verification   |           |     |  |
|  | [K6_K03] is able to react in emergency situations, threats to health and life when using energy devices, is aware of the impact of engineering activities on the environment  |  | The student can design electrical installation.              |                                     |  | [SK5] Assessment of ability to solve problems that arise in practice |           |     |  |
|  | [K6_W03] knows the basics of automation and automatic regulation, knows the principles of the selection of electrical devices, drive systems and their control  |  | The student can select items electrical installation system. |                                     |  | [SW1] Assessment of factual knowledge                                |           |     |  |
| [K6_W08] has basic knowledge in the field of intellectual property protection and patent law, knows and understands the basic processes of energy production and use, knows and understands the principles of modern heating and power systems |   | The student knows circuits and systems protection against electric shocks and phenomena occurring in during normal and emergency operation electrical installations. |  |                                     | [SW3] Assessment of knowledge contained in written work and projects |  |           |     |  |
| Subject contents   | Electrical installations - definitions, structure, requirements. Impact of working and short-circuit currents on installation components. Power cables, fuses, circuit breakers, differential circuit breakers - design and characteristics. Principles of installation design. |  |  |                                     |  |  |           |     |  |
| Prerequisites and co-requisites  | Basics of electrical engineering.   |  |  |                                     |  |  |           |     |  |
| Assessment methods   |   |  | Passing threshold  |                                     |  | Percentage of the final grade  |           |     |  |
| and criteria   |   |  | 60.0%  |                                     |  | 100.0%   |           |     |  |
