GDAŃSK UNIVERSITY OF TECHNOLOGY

Subject card

Subject name and code	Diploma seminar, PG_00055951		
Field of study	Power Engineering, Power Engineering, Power Engineering		
Date of commencement of studies	October 2023	Academic year of realisation of subject	2026/2027
Education level	first-cycle studies	Subject group	Optional subject group
Mode of study	Full-time studies	Mode of delivery	at the university
Year of study	4	Language of instruction	Polish
Semester of study	7	ECTS credits	4.0
Learning profile	general academic profile	Assessment form	assessment
Conducting unit	Division of Fluid-Flow Machinery -> Institute of Energy -> Faculty of Mechanical Engineering and Ship Technology -> Faculties of Gdańsk University of Technology		
Name and surname of lecturer (lecturers)	Subject supervisor	dr hab. inż. Marian Piwowarski	
	Teachers	dr hab. inż. Marian Piwowarski	

Lesson types

Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
Number of study hours	0.0	0.0	0.0	0.0	15.0	15

E-learning hours included: 0.0

eNauczanie source addresses:
Moodle ID: 8543 Seminarium dyplomowe

Learning activity and number of study hours

Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM
Number of study hours	15	36.0	49.0	100

Subject objectives

The aim of the course is to prepare for writing a diploma thesis and to monitor the progress in the implementation of the diploma thesis.

Learning outcomes

Course outcome	Subject outcome	Method of verification
[K6_K02] is able to work in a group taking different roles in it, can think and act in an entrepreneurial way, is aware of responsibility for their own work and responsibility for teamwork	The student is able to work in a group and take responsibility for group work.	[SK1] Assessment of group work skills
[K6_U01] can obtain information from literature and other sources, organize, interpret it and draw and formulate conclusions; has the ability to self-educate, interprets the results of completed engineering tasks, is able to design simple energy systems and their systems	The student presents the progress of the thesis, knows the current state of the law in Poland and the EU in the field of energy law and energy technology, performs the literature review required for the thesis.	[SU4] Assessment of ability to use methods and tools
[K6_K01] is aware of the need for training and self-improvement in the profession of energy and the possibility of further education; can think and act in a creative and entrepreneurial manner; can define priorities for the implementation of an individual or group task	The student presents the progress of the thesis in the form of presentation with an indication of self-motivation of self-study	[SK2] Assessment of progress of work
[K6_W08] has basic knowledge in the field of intellectual property protection and patent law, knows and understands the basic processes of energy production and use, knows and understands the principles of modern heating and power systems	The student has knowledge of intellectual property and patent protection in the field of modern heat and power systems.	[SW2] Assessment of knowledge contained in presentation
[K6_U13] can read architectural, construction and geodesy drawings, and can use the known computer software to prepare a drawing part of technical documentation for the sanitary, energy, hydropower industry and prepare a text or presentation including a discussion of the implemented results	The student is able to use IT tools in the design of energy installations and systems.	[SU4] Assessment of ability to use methods and tools

Subject contents

Course content – seminar

Basic information on intellectual property in European and national law. Individual student work related to the preparation of subsequent stages of the diploma thesis, the results of which are presented and assessed during seminar classes.

Prerequisites and co-requisites

Assessment methods and criteria

Subject passing criteria	Passing threshold	Percentage of the final grade
presentation	100.0%	100.0%
