

Subject card

Subject name and code	Team Project, PG_00056044						
Field of study	Power Engineering, Power Engineering, Power Engineering						
Date of commencement of studies	October 2023	Academic year of realisation of subject			2025/2026		
Education level	first-cycle studies	Subject group			Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	3	Language of instruction			Polish not applied		
Semester of study	6	ECTS credits			3.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Institute of Energy -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. inż. Jerzy Gluch				
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	0.0	30.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		8.0		37.0	75
Subject objectives	The aim of the course is to verify the ability to use the acquired knowledge to design a system, installation or device and create their technical documentation.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_W10] knows the basic installations in the field of renewable energy sources and their impact on the environment		The student is able to design installations for servicing energy systems		[SW3] Assessment of knowledge contained in written work and projects [SW1] Assessment of factual knowledge		
	[K6_U11] Can design and properly dimension basic foundations in hydrotechnical construction facilities; can evaluate and list the loads acting on constructions, knows the codes of modern geotechnical investigations and technologies, knows the principles of foundations and safe design of foundations of typical buildings		The student is able to apply the knowledge in the field of foundations of energy facilities		[SU5] Assessment of ability to present the results of task [SU1] Assessment of task fulfilment		
	[K6_U02] is able to apply the learned mathematical methods to the analysis and design of elements, systems and energy systems		The student is able to apply mathematical methods in the design of energy systems		[SU3] Assessment of ability to use knowledge gained from the subject [SU2] Assessment of ability to analyse information		
	[K6_W09] knows the dangers of electrical devices and the principles of protection against them, has basic knowledge of heat exchangers, has basic knowledge of power equipment such as pumps, compressors, turbines, combustion engines, boilers, pipelines and their accessories and methods of their selection depending on the needs		The student is able to select and assemble energy installations for various thermal power plants		[SW3] Assessment of knowledge contained in written work and projects [SW1] Assessment of factual knowledge		
Subject contents	Solving a research or construction task in a given scope. Presentation of results.						

Prerequisites and co-requisites	Thermodynamics, fluid dynamics, heat transfer		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Project realisation	100.0%	100.0%
Recommended reading	Basic literature	Individual literature studies are part of the task	
	Supplementary literature	not applied	
	eResources addresses	Adresy na platformie eNauczanie:	
Example issues/ example questions/ tasks being completed	Analysis of the task, setting criteria, selection of the solution, calculations, creation of technical documentation.		
Work placement	Not applicable		

Document generated electronically. Does not require a seal or signature.
