

Subject card

Subject name and code	Intellectual Property Protection, PG_00041986						
Field of study	Power Engineering, Power Engineering						
Date of commencement of studies	October 2023		Academic year of realisation of subject		2023/2024		
Education level	first-cycle studies		Subject group		Obligatory subject group in the field of study Humanistic-social subject group		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	1		Language of instruction		English		
Semester of study	1		ECTS credits		1.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Department of Manufacturing and Production Engineering -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Artur Sitko				
	Teachers		dr inż. Artur Sitko				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	0.0	0.0	0.0	15
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	15		3.0		7.0	25
Subject objectives	Acquiring basic knowledge of the scope of protection of intellectual and industrial property. IP law course is intended to introduce copyright law definitions and protection remedies. It begins with comparison of the Copyright System in common law and Authors Right System in continental Europe. This course covers the basics of copyright law, patents and trademarks in Europe and refers to International WIPO Conventions. Transnational cases and problems of protecting copyrights in Internet.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[K6_W71] has general knowledge in humanistic, social, economic or legal sciences	The student knows and is able to identify the basic social and market mechanisms.	[SW1] Assessment of factual knowledge
	[K6_W08] has basic knowledge in the field of intellectual property protection and patent law, knows and understands the basic processes of energy production and use, knows and understands the principles of modern heating and power systems	Student has knowledge of copyright law and author's rights protection law in Europe. Student identifies the types of protected works and scope of copyright protection. Student has basic knowledge of patents and trademarks protection in legal system. Student learns the author's rights system in Europe. Student learns the remedies within copyright protection law. Student learns the basic legal definitions applied in IP law.	[SW1] Assessment of factual knowledge [SW3] Assessment of knowledge contained in written work and projects
