

## Subject card

Subject name and code	Biomaterials, PG_00055761						
Field of study	Mechanical and Medical Engineering						
Date of commencement of studies	October 2023	Academic year of realisation of subject			2025/2026		
Education level	first-cycle studies	Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	3	Language of instruction			Polish		
Semester of study	5	ECTS credits			4.0		
Learning profile	general academic profile	Assessment form			exam		
Conducting unit	Institute of Manufacturing and Materials Technology -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. inż. Beata Świczko-Żurek				
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	15.0	15.0	0.0	45
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	45		5.0		50.0	100
Subject objectives	Main aims of the course include: gaining by the student of fundamental knowledge about biomaterials, including metallic, polymer, ceramic and composite materials, and about their fabrication, surface modification, and applications for implants; development of skills for assessment, selection and fabrication of biomaterials.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K6_K02] he/she is aware of importance of professional dealing and to fulfill ethics obligations, he/she understands other (non-technical) abilities of mechanical engineering professional, their influence on the society and security of environment, he/she is aware of importance of social cooperation	Can work with a group and perform simple engineering tasks.			[SK3] Assessment of ability to organize work [SK5] Assessment of ability to solve problems that arise in practice [SK1] Assessment of group work skills		
	[K6_W03] he/she has skills in the field chemistry and biochemistry	Has basic knowledge in the field of chemistry.			[SW3] Assessment of knowledge contained in written work and projects		
	[K6_U09] he/she is able to select proper constructive materials to design the device	Can design a simple medical device.			[SU3] Assessment of ability to use knowledge gained from the subject [SU4] Assessment of ability to use methods and tools		
[K6_W04] he/she has skills in the field mechanical testing of materials used in engineering and mechanical-medical area	He can choose the material and design a simple medical device.			[SW3] Assessment of knowledge contained in written work and projects			

Subject contents	<p>Lectures: Classification of medical materials. Materials for binding the tissues. Dressing materials. Materials for surgery tools. Pasivation methods of biomaterials` surface. Sterilization and disinfection. Structural materials for orthopaedy. Materials for prosthetics. Materials for orthotics. Orthopaedic fillers. Cosmetic prostheses. Rehabilitation equipment - construction and supplementary materials. Physical and chemical investigation techniques of biomaterials. Chemical and biological investigation techniques of biomaterials. Directions of development of biomaterials.</p> <p>Laboratory exercises: Characterists of laboratory work as technique for widening of knowledge and skills in area of biomaterials science. Characteristics, structure and application of austenitic steels used as biomaterials. Characteristics, structure and application of titanium alloys used as biomaterials. Influence of surface treatment on corrosion resistance of metallic materials used for implants in bone surgery. Selection of steel grade and complex of mechanical properties for some specified surgery tools. Technologies of oxidation of steels and Ti alloys by chemical method. Technologies of oxidation of steels and Ti alloys by electrochemical method. Technologies of fabrication of hydroxyapatite coatings by electrophoretic method.</p> <p>Project: Material selection and design of a simple medical device.</p>		
Prerequisites and co-requisites	Materials Science must be approved		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Lectures and written exam	70.0%	70.0%
	Practical exercise	30.0%	30.0%
Recommended reading	Basic literature	<ol style="list-style-type: none"> <li>1. A. Zieliński, B. Świczko-Żurek, A. Ossowska, S. Sobieszczyk. wyd. Politechniki Gdańskiej, skrypt sieciowy.</li> <li>2. Biomateriały, seria Biocybernetyka i Inżynieria Biomedyczna 2000, red. S. Błażewicz, L. Stoch, Exit 2004</li> <li>3. J. Marciniak, Biomateriały, wyd. Politechniki Śląskiej 2002</li> <li>4. B. Świczko-Żurek, Biomateriały, wyd. Politechniki Gdańskiej 2009 (podręcznik w wersji elektronicznej)</li> <li>5. M. Kutz, Biomaterials Engineering and Design Handbook, McGraw-Hill 2009</li> </ol>	
	Supplementary literature	<ol style="list-style-type: none"> <li>1. J. Marciniak, M. Kaczmarek, A. Ziębowicz, Biomateriały w stomatologii, wyd. Politechniki Śląskiej 2008</li> <li>2. J. Marciniak, Z.
