

## Subject card

Subject name and code	, PG_00056087						
Field of study	Mechanical and Medical Engineering						
Date of commencement of studies	October 2023	Academic year of realisation of subject			2025/2026		
Education level	first-cycle studies	Subject group					
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	3	Language of instruction			Polish		
Semester of study	5	ECTS credits			4.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Institute of Manufacturing and Materials Technology -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Beata Majkowska-Marzec				
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	0.0	15.0	0.0	0.0	45
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	45		0.0		0.0	45
Subject objectives	The aim of the course is to obtain knowledge in the field of degradation of materials and products, in particular biomedical materials and implants. The second goal is to acquire skills in the evaluation of the degradation mechanism of the biomaterial or implant, the causes of degradation, and the evaluation of the biomaterial's susceptibility to degradation.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K6_U07] he/she is able to identify the problem and list simple engineering tasks to solve this problem in practice, he/she is able to critically analyze the proposed technical solutions and conclude whether these solutions can be implemented to solve problems related to design of mechanical devices and mechanical-medical devices	The student is able to identify the degradation mechanism, determine its possible causes and determinants of the process, and propose countermeasures.			[SU2] Assessment of ability to analyse information [SU3] Assessment of ability to use knowledge gained from the subject		
	[K6_U09] he/she is able to select proper constructive materials to design the device	The student has skills in the proper selection of biomaterials for implants in terms of their minimum degradation and maximum service life.			[SU1] Assessment of task fulfilment [SU3] Assessment of ability to use knowledge gained from the subject [SU4] Assessment of ability to use methods and tools		
	[K6_W13] he/she has knowledge related to application of engineering approaches in medicine or application of medical devices and rehabilitation devices	The student is able to indicate factors and mechanical properties determining the lifetime of implants.			[SW1] Assessment of factual knowledge [SW3] Assessment of knowledge contained in written work and projects		
	[K6_W04] he/she has skills in the field mechanical testing of materials used in engineering and mechanical-medical area	The student has knowledge of the types of biomaterials, implants made of them, environmental exposures, methods of research on degradation processes.			[SW1] Assessment of factual knowledge [SW2] Assessment of knowledge contained in presentation		
Subject contents	The concept of the material degradation process. The specificity of the degradation of materials in the biological environment of the organism. Electrochemical, mechanical, mechanical-chemical degradation of metal biomaterials and coatings; typical cases; test methods; ways of prevention in the design and monitoring phase. Mechanical degradation of ceramic biomaterials; typical cases; test methods; ways of prevention in the design and monitoring phase. Mechanical and chemical degradation of biopolymers; typical cases; test methods; ways of prevention in the design and monitoring phase.						

Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Laboratory exercises	50.0%	50.0%
	Writing exam	50.0%	50.0%
