

Subject card

Subject name and code	Environmental threats in medical engineering, PG_00055772						
Field of study	Mechanical and Medical Engineering						
Date of commencement of studies	October 2023		Academic year of realisation of subject		2026/2027		
Education level	first-cycle studies		Subject group		Obligatory subject group in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	4		Language of instruction		Polish		
Semester of study	7		ECTS credits		1.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Department of Energy and Industrial Apparatus -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Bartosz Dawidowicz				
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	0.0	0.0	0.0	15
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	15		1.0		9.0	25
Subject objectives	Presentation of basic knowledge about the essence of an environmental risks associated with biomedical engineering. Presentation methods to counteract these threats, and to present selected examples neutralization and elimination of those risks.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_K02] he/she is aware of importance of professional dealing and to fulfill ethics obligations, he/she understands other (non-technical) abilities of mechanical engineering professional, their influence on the society and security of environment, he/she is aware of importance of social cooperation		He is able to solve technical problems in accordance with the rules and professional ethics, he knows what the consequences are. Can work with other teams to solve the problem.		[SK5] Assessment of ability to solve problems that arise in practice		
	[K6_U06] he/she has skills to work in industry and follow the rules of safety regulations, he/she is able to analyze basic economics problems to delineate the direction of solution by using engineering methods		Solves technical problems in the field of medical engineering in accordance with the applicable rules, and performs economic analyzes in this area.		[SU3] Assessment of ability to use knowledge gained from the subject		
	[K6_K01] he/she knows his/her proficiencies and his/her limitations in performing professional tasks, he/she is aware of needing to improve his/her skills through the whole life, he/she has entrepreneurship and innovation skills, he/she is aware of engineering skills from the society point of view		He can search and obtain the necessary information on the most modern technical solutions. Knows how to use the acquired information in the development and implementation of innovative technical solutions. He knows his competences and the value of engineering knowledge.		[SK5] Assessment of ability to solve problems that arise in practice		
	[K6_W12] he/she has basic knowledge in the field of fundamental medical sciences, human body anatomy, and physiology, salvage service		Has theoretical knowledge of the construction and operation of medical equipment and the principles of its use.		[SW1] Assessment of factual knowledge		

Subject contents	Lecture: Hazards - basic concepts. The types of hazards. Sources, causes and origin of hazards. The influence of hazards of an environmental. Protection against hazards, personal protection, protection of equipment and facilities. Methods and apparatus for removal and neutralization of the effects of hazards. Measurement and monitoring of environmental pollution.		
Prerequisites and co-requisites	Knowledge of physics, mechanics, thermodynamics and materials science. Basic knowledge of biology and chemistry.		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Test	56.0%	100.0%
Recommended reading	Basic literature	<ol style="list-style-type: none">1. Romanowska-Słomka I.: Zagrożenie biologiczne w służbie zdrowia. Wykazy. Charakterystyka. OSPIP, 2006.2.
