

Subject card

Subject name and code	, PG_00056099						
Field of study	Mechanical and Medical Engineering						
Date of commencement of studies	October 2023	Academic year of realisation of subject			2025/2026		
Education level	first-cycle studies	Subject group					
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	3	Language of instruction			Polish		
Semester of study	6	ECTS credits			4.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Institute of Mechanics and Machine Design -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. inż. Wiktoria Wojnicz				
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	30.0	0.0	0.0	45
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	45		0.0		0.0	45
Subject objectives	The aim of the study is to acquire knowledge about methods and tools used in applied biomechanics						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K6_U05] he/she is able to use analytic and modelling methods to formulate and solve engineering tasks related to the mechanical-medical area	Student can state problem related to mechanical-medical area by using analytical methods and define engineering tools than should be applied to solve a problem			[SU1] Assessment of task fulfilment [SU2] Assessment of ability to analyse information [SU3] Assessment of ability to use knowledge gained from the subject [SU4] Assessment of ability to use methods and tools [SU5] Assessment of ability to present the results of task		
	[K6_U03] he/she is able to use information-communication skills to solve typical engineering tasks related to design, production and utilization	Student can solve problem related to mechanical-medical area by using engineering tools			[SU1] Assessment of task fulfilment [SU2] Assessment of ability to analyse information [SU3] Assessment of ability to use knowledge gained from the subject [SU4] Assessment of ability to use methods and tools [SU5] Assessment of ability to present the results of task		
	[K6_U08] he/she is able to assess whether proposed methods and tools can be used in practice to solve simple engineering task related to machine design, manufacturing and utilization	Student can choose and apply measurement methods and engineering tools to solve a problem related to mechanical-medical area			[SU1] Assessment of task fulfilment [SU2] Assessment of ability to analyse information [SU4] Assessment of ability to use methods and tools		
	[K6_W09] he/she has basic knowledge related to numerical methods and engineering software used to analyze, model and design a given mechanical system	Student can formulate steps of solution related to the given mechanical-medical problem by using engineering approach			[SW1] Assessment of factual knowledge [SW2] Assessment of knowledge contained in presentation		

Subject contents	<p>Lecture (15h)</p> <ol style="list-style-type: none"> 1. Biomechanical analysis in postural research 2. Biomechanical analysis in postural disease research 3. Gait analysis: gait parameters in normal gait. 4. Gait analysis: gait parameters in disturbed gait. 5. Mechanical testing of tissues 6. Mechanical testing of systems applied in osteosynthesis 											
	<p>Labs (30h)</p> <p>Health and safety regulations in biomechanical studies</p> <p>Assessment of MVC of the chosen muscular groups</p> <p>Biomechanical analysis in postural research</p> <p>Biomechanical analysis in gait research</p> <p>Estimation of mechanical properties of tissues</p> <p>Estimation of mechanical properties of systems applied in osteosynthesis</p> <p>Test</p> <p>Repeat test</p>											
Prerequisites and co-requisites	Fundamentals of maths, mechanics, strength of materials and biomechanics											
Assessment methods and criteria	<table border="1"> <thead> <tr> <th data-bbox="453 1509 794 1538">Subject passing criteria</th> <th data-bbox="799 1509 1141 1538">Passing threshold</th> <th data-bbox="1145 1509 1473 1538">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td data-bbox="453 1545 794 1574">lecture passing</td> <td data-bbox="799 1545 1141 1574">50.0%</td> <td data-bbox="1145 1545 1473 1574">50.0%</td> </tr> <tr> <td data-bbox="453 1581 794 1610">lab passing</td> <td data-bbox="799 1581 1141 1610">50.0%</td> <td data-bbox="1145 1581 1473 1610">50.0%</td> </tr> </tbody> </table>			Subject passing criteria	Passing threshold	Percentage of the final grade	lecture passing	50.0%	50.0%	lab passing	50.0%	50.0%
Subject passing criteria	Passing threshold	Percentage of the final grade										
lecture passing	50.0%	50.0%										
lab passing	50.0%	50.0%
