<tr><td>Subject contents</td><td>Defining the problem. Solving engineering tasks using current knowledge and expertise. The use of modern tools supporting engineering activities and cooperation.

It is planed, to perform projects in cooperation with students from other degree courses, for example Mechatronics.Students will cooperate in teams to expand existing or develop new solutions (based on a given specifications and constraints) in scope of, for example, mechanical construction, automatic control of device functions, communication, sensors, actuators, safety elements etc</td></tr>
