

Subject card

Subject name and code	Maths III, PG_00055173						
Field of study	Mechanical Engineering						
Date of commencement of studies	October 2023		Academic year of realisation of subject		2024/2025		
Education level	first-cycle studies		Subject group		Obligatory subject group in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	2		Language of instruction		English		
Semester of study	3		ECTS credits		5.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Mathematics Center -> Vice-Rector for Education						
Name and surname of lecturer (lecturers)	Subject supervisor		dr Stanisław Domachowski				
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	30.0	0.0	0.0	0.0	60
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	60		8.0		57.0	125
Subject objectives	The aim of this subject is to obtain the student's competence in the range of using the basic methods of mathematical analysis, ordinary differential equations,partial differential equations . Furthermore, the student is able to use this knowledge to solve simple theoretical and practical problems that can be found in the field of engineering.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	K6_W01		Students calculate doubleintegrals, and explains themethod of substitution in thedouble integral. Student appliesdouble integrals in solvinggeometrical problems. Studentcalculates triple integrals, andexplains the method ofsubstitution in the triple integral.Student applies triple integrals ingeometrical problems.Studentcalculates the radius ofconvergence and the interval ofconvergence of a power series.Student demonstrates somechosen techniques of solvingordinary differential equations.Student determines general andparticular solutions of some typesof the first and second orderdifferential equations.Student determines general andparticular solutions of higherorders linear differential equationswith constant coefficients.Student determines general andparticular solutions of systems ofdifferential equations.Student determines general andparticular solutions of the partiallinear differential equations of first order		[SW1] Assessment of factual knowledge		
	K6_U01		The student combines knowledge of mathematics with knowledge from other fields.		[SU1] Assessment of task fulfilment		

Subject contents	Basic vectors definitions and properties. Dot product, crros product, their properties and its applications. The triple scalar product and applications. Equations of lines and planes in 3-space. The distance from a point to a plane. Angles between planes and lines. Limit and continuity of a function of several variables, partial derivatives, total differential, maxima and minima of a function of several variables, implicit functions. Double integral over a rectangle and the normal domain. Iterated integrals. Change of variables in a double integral, applications of double integrals. Triple integral over a cuboid and the normal domain, Change of variables in a triple integral, applications of triple integrals. First order differential equations. General and particular solution of the differential equation. Initial value problem. Separable, linear, Bernoulli and exact differential equations. Integrating factor. Second order differential equations. Linear differential equations of order n with constant coefficients. Fundamental set of solutions of the linear homogeneous equation. Non-homogeneous linear differential equations. Systems of differential equations. Linear first order partial differential equations. Quasi-linear first order partial differential equations. Characteristic equations.		
Prerequisites and co-requisites	No recommendations		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	tests, • Active participation during classes	50.0%	100.0%
