

Subject card

Subject name and code	Hydraulics and pneumatics, PG_00055062						
Field of study	Management and Production Engineering						
Date of commencement of studies	October 2023	Academic year of realisation of subject			2024/2025		
Education level	first-cycle studies	Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	2	Language of instruction			Polish		
Semester of study	4	ECTS credits			3.0		
Learning profile	general academic profile	Assessment form			exam		
Conducting unit	Zakład Konstrukcji Maszyn i Inżynierii Medycznej -> Institute of Mechanics and Machine Design -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. inż. Paweł Śliwiński				
	Teachers		dr hab. inż. Paweł Śliwiński				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	0.0	15.0	0.0	0.0	45
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	45		4.0		26.0	75
Subject objectives	Acquainting with physical phenomena, the basics of design and operation of hydraulic and pneumatic drive and control systems						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_K01] feels the need for self-realization by learning throughout life, is looking for modern and innovative solutions in their actions, is able to think creatively and act in an entrepreneurial way		Student is able to identify and formulate specifications for simple practical engineering tasks and critically analyse existing technical solutions and evaluate the functioning of basic hydraulic and pneumatic systems.		[SK3] Assessment of ability to organize work [SK5] Assessment of ability to solve problems that arise in practice [SK2] Assessment of progress of work		
	[K6_U02] has the ability of self-learning and expanding knowledge in a specialized field of engineering production		Student has knowledge of the design of basic hydraulic and pneumatic systems.		[SU2] Assessment of ability to analyse information [SU4] Assessment of ability to use methods and tools		
	[K6_W04] has basic knowledge in the field of automation, robotics and control of production processes, has elementary knowledge of electrical and electronic applications in the production system, has basic knowledge of thermodynamics and fluid mechanics as well as the selection and design of hydraulic and pneumatic systems		Student is able to analyse basic hydraulic and pneumatic systems.		[SW1] Assessment of factual knowledge		

Subject contents	LECTURE: Structure of hydraulic and pneumatic drive and control. Properties of working fluid and air pressure losses in the institution and their calculation. Flows through the slots. Basic elements and hydrostatic and pneumatic systems of machines: pumps, motors, actuators, valves, filters, accumulators, compressed air units. Special electrohydraulic and electropneumatic machine automation systems. TUTORIALS: Basic calculations of hydraulic and pneumatic drive systems. LABORATORIES: Practical familiarization with the structure and operation of hydraulic and pneumatic elements as well as self-assembly of basic systems.		
Prerequisites and co-requisites	Physics		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Laboratory pass	56.0%	34.0%
	Lecture pass	56.0%	66.0%

Example issues/ example questions/ tasks being completed	<ol style="list-style-type: none"> 1. Influence of fluid parameters on flow phenomena in pipes and throttling elements. 2. Influence of pipe and throttling element parameters (elbow, valve, etc.) on pressure drop. 3. Is pressure drop in a pipe or any installation element desirable or not and why? 4. Throttling motor speed control. What does motor speed depend on? Pump operating pressure and pressure in motor connections. 5. Volumetric motor speed control. What does motor speed depend on? Pump operating pressure and pressure in motor connections. 6. Draw a pneumatic system with two actuators A and B, where actuator A is single-acting and B is double-acting. Both actuators start moving simultaneously when the START button is pressed and both return simultaneously when both reach the extreme extended position. 		
Work placement	Not applicable
