

Subject card

Subject name and code	Machining, PG_00055056						
Field of study	Management and Production Engineering						
Date of commencement of studies	October 2023	Academic year of realisation of subject			2024/2025		
Education level	first-cycle studies	Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	2	Language of instruction			Polish		
Semester of study	3	ECTS credits			2.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Institute of Manufacturing and Materials Technology -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor	dr hab. inż. Daniel Chuchała					
	Teachers	dr hab. inż. Daniel Chuchała dr inż. Aleksandra Suchta					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	15.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		4.0		16.0	50
Subject objectives	Preparation to recognition of cutting processes and machine tools.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[K6_W09] knows the general principles of creating and developing forms of individual entrepreneurship and stimulating employee creativity, using knowledge in the field of design, production and operation of machinery and technical devices	The student is able to appropriately select the form and dimensions of semi-finished products needed to produce a component with the lowest possible cost for a given batch size	[SW1] Assessment of factual knowledge
	[K6_U08] can assess the usefulness of routine methods and tools for solving practical production tasks in measuring in order to supervise processes and analyze the functioning of production systems	The student is able to choose the correct machining process and the type of cutting tools for a given type of the manufactured element.	[SU4] Assessment of ability to use methods and tools
	[K6_W06] has knowledge of the life cycle of products and mechanical devices and systems, in the field of machine parts manufacturing techniques, as well as the possibilities and trends in the development of machines and production devices and process control	Student knows the basic types of tool materials, their application and basic wear mechanisms in machining processes.	[SW1] Assessment of factual knowledge
	[K6_U09] can use analytical techniques as well as computer simulation and numerical analysis methods in solving specific problems in the field of production engineering, is able to carry out simple engineering tasks related to the production of typical machine parts using widely understood techniques and computer tools, is able to select and apply appropriate methods of project planning and control courses with the use of computer aided means	The student is able to select the correct parameters of the cutting process with the use of tool catalogs, also in on-line versions, for a given set of workpiece material and cutting edge material.	[SU4] Assessment of ability to use methods and tools
	[K6_W13] has detailed knowledge of the production and operation of machines and devices, diagnosing their technical conditions and selection of regeneration techniques	The student is able to choose the correct machining process and the type of cutting tools for a given type of the manufactured element.	[SW1] Assessment of factual knowledge
	[K6_K02] is able to interact and work in a group, assuming different roles, can inspire and organize the learning process of others, properly identifies priorities for realization of a task specified by themselves or others	The student is able to determine the sequence of machining processes performed in order to produce a element with the expected dimensional accuracy and surface quality	[SK1] Assessment of group work skills
Subject contents	<p>LECTURE Geometric and kinematic parameters of cutting. Tool and workpiece movements. The geometry of the blades in the tool and working system, the geometry of the cut layer. The phenomenon of formation chips and types of chips. Heat and temperature in the cutting zone. Cooling and lubricating agents. Wearcutting tools. Cutting force and power. Tool materials and rules for their selection. Basic methods of machining: turning, milling, drilling, countersinking, reaming. LABORATORY Cutting materials and cutting-off machines. Machining on lathes. Machining on drills. Machining on milling machines. Machining of gears. Machining on grinders. Machining on planers and slotters.</p>		
Prerequisites and co-requisites	Ability to produce and read executive technical drawings.		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Laboratory	100.0%	30.0%
	Lecture	60.0%	70.0%
