

## Subject card

Subject name and code	FORECASTING AND OPTIMIZATION IN LOGISTICS, PG_00061120						
Field of study	Management						
Date of commencement of studies	October 2023	Academic year of realisation of subject			2024/2025		
Education level	second-cycle studies	Subject group			Optional subject group		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	2	Language of instruction			English		
Semester of study	3	ECTS credits			2.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Faculty of Management and Economics						
Name and surname of lecturer (lecturers)	Subject supervisor	dr Mateusz Muchlado					
	Teachers	dr Mateusz Muchlado					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	30.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study		SUM
	Number of study hours	30	3.0		17.0		50
Subject objectives	Acquiring knowledge and skills in using tools to support and optimize logistics processes.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K7_U04] prepares and presents convincing, professional presentations of analysis results, with their in-depth interpretation	The student is able to present the solutions he has developed in an attractive and accessible way to the group. The student is able to use specialized tools used to present statistical and logistic data.			[SU1] Assessment of task fulfilment [SU5] Assessment of ability to present the results of task		
	[K7_K01] recognizes the importance of knowledge related to the field of study in solving cognitive and practical problems	The student has knowledge of logistics processes and the projection of demand and supply. He can use his knowledge in practice to make the right decisions regarding logistics process.			[SK1] Assessment of group work skills		
Subject contents	1. Basics of logistics processes and management methods.2. Basics of warehouse management, assortment organization strategies.3. Naive methods in estimating storage demand.4. Statistical methods of controlling logistics processes.5. Risk management in logistics processes.6. Simulation game regarding internal transport processes and resource-based planning.						
Prerequisites and co-requisites	Basic knowledge of economics and management, English language usage						
Assessment methods and criteria	Subject passing criteria	Passing threshold			Percentage of the final grade		
	In-semester mini-project's	60.0%			50.0%		
	Final exam	60.0%			50.0%		

Recommended reading	Basic literature	Multimedia presentation, available on the e-learning platform.  Additional materials available on the e-learning platform.
