

Subject card

| | | | | | | | |
|---|--|--|-------------------------------------|------------|--|---------|-----|
| Subject name and code | Algorithms and data structures, PG_00045360 | | | | | | |
| Field of study | Data Engineering | | | | | | |
| Date of commencement of studies | October 2023 | Academic year of realisation of subject | | | 2023/2024 | | |
| Education level | first-cycle studies | Subject group | | | Obligatory subject group in the field of study Subject group related to scientific research in the field of study | | |
| Mode of study | Full-time studies | Mode of delivery | | | at the university | | |
| Year of study | 1 | Language of instruction | | | English | | |
| Semester of study | 2 | ECTS credits | | | 5.0 | | |
| Learning profile | general academic profile | Assessment form | | | exam | | |
| Conducting unit | Department of Algorithms and Systems Modelling -> Faculty of Electronics, Telecommunications and Informatics | | | | | | |
| Name and surname of lecturer (lecturers) | Subject supervisor | dr inż. Krzysztof Manuszewski | | | | | |
| | Teachers | dr Marcin Jurkiewicz mgr inż. Tomasz Goluch mgr inż. Robert Ostrowski mgr inż. Andrzej Jastrzębski dr inż. Krzysztof Manuszewski | | | | | |
| Lesson types and methods of instruction | Lesson type | Lecture | Tutorial | Laboratory | Project | Seminar | SUM |
| | Number of study hours | 30.0 | 0.0 | 15.0 | 15.0 | 0.0 | 60 |
| | E-learning hours included: 0.0 | | | | | | |
| Learning activity and number of study hours | Learning activity | Participation in didactic classes included in study plan | Participation in consultation hours | | Self-study | SUM | |
| | Number of study hours | 60 | 10.0 | | 55.0 | 125 | |
| Subject objectives | The aim of the course is to introduce students to algorithms and data structures. The basic and advanced data structures are presented as well as basic algorithms for selected domains. This will be followed by basics approaches to algorithm design. | | | | | | |
| Learning outcomes | Course outcome | Subject outcome | | | Method of verification | | |
| | [K6_U03] analyses problems and creates appropriate models, data structures and algorithms (including heuristic and numerical ones), assesses their computational complexity, estimates errors of the received solutions | Student is able to analyze problems and create valid models. Student knows basic data structures and is able to understand and implement algorithms with various complexity. Student understands idea of exact and approximation algorithm. Student knows the idea of computational complexity | | | [SU4] Assessment of ability to use methods and tools [SU1] Assessment of task fulfilment | | |
| | [K6_W06] Knows the criteria and concepts of artificial intelligence, understands the operation of algorithms for intelligent computing, the concept of descriptive logic, combinatorial optimization algorithms, methods of construction, analysis and evaluation of algorithms, including discrete ones and problems of resolving conflicts in non-algorithmic decision making. | Student knows the methods of construction and evaluation of algorithm. Student is able to chose algorithm for particular problem | | | [SW1] Assessment of factual knowledge | | |

| Subject contents | <p>Schema of problem solution: analysis of situation and analysis of goal. Algorithmic problems, algorithms notation, analysis, correctness, stop.</p> <p>Estimation of function growth. O notation, time vs. complexity. Examples if recursion/iteration, recursive and iterative algorithms</p> <p>Examples of recursion for algorithms based on strategy divide and conquer</p> <p>Basic data structures: list, queue, stack and methods of their realization</p> <p>Tables with hashing</p> <p>Simple sorting algorithms: insertion, selection, change. Quick and heap sort. Bucket sort and positional sort. Search for k-th minimal element</p> <p>Binary search trees, "Red-black trees, B-Trees</p> <p>Joinable heaps.</p> <p>Basic approaches for algorithms design.</p> <p>Decision trees traversing.</p> | | | | | | | | | | | | | | |
