

Subject card

Subject name and code	Analytic geometry, PG_00021022							
Field of study	Mathematics							
Date of commencement of studies	October 2023		Academic year of realisation of subject			2023/2024		
Education level	first-cycle studies		Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery			at the university		
Year of study	1		Language of instruction			Polish		
Semester of study	1		ECTS credits			4.0		
Learning profile	general academic profile		Assessment form			assessment		
Conducting unit	Department of Differential Equations and Mathematical Applications -> Faculty of Applied Physics and Mathematics							
Name and surname	Subject supervisor	dr Agnieszka Bartłomiejczyk						
of lecturer (lecturers)	Teachers		mgr inż. Ursz dr Agnieszka	<				
Lesson types and methods	Lesson type	Lecture	Tutorial	Laboratory	Projec	t	Seminar	SUM
of instruction	Number of study hours	30.0	30.0	0.0	0.0		0.0	60
	E-learning hours included: 0.0							
Learning activity and number of study hours	Learning activity Participation in classes include plan				Self-study SUM			
	Number of study 60 nours			5.0		35.0		100
Subject objectives	Student knows calculus of vectors, certain geometrical objects in Euclidean space, relations between objects, relations between algebraical and geometrical description of transformations, gives competition of analize and synteze mentioned problems.							
Learning outcomes	Course outcome		Subject outcome			Method of verification		
	K6_U01		Student can formulate and solve the problems of vector calculus.			[SU4] Assessment of ability to use methods and tools		
	K6_W07		Student can calculate the vector and mixed products and the distance between points.			[SW1] Assessment of factual knowledge		
	K6_W04		Student knows the basic theorems in the range the given subject.			[SW1] Assessment of factual knowledge		
	K6_U08		Student is able to properly use the concepts they met, can formulate definitions and theorems concerning them, uses the proper record. Student identyficates certain geometrical objects in Euclidean space, analyzes relations between objects.			[SU1] Assessment of task fulfilment [SU2] Assessment of ability to analyse information [SU4] Assessment of ability to use methods and tools		
Subject contents	 Vectors without a coordinate system (vectors and operations on vectors, scalar product, vector product, mixed product of vectors, vector identities, collinear vectors, co-planar vectors, linearly dependent vectors). Vectors in the coordinate system (addition of vectors and multiplication of a vector by a number, scalar product, vector product, mixed product). Plane analytic geometry (distance from poin to plane, rotation of the coordinate system, second-order curves, polar coordinates). Three dimensional analytic geometry (position of points relative to a plane, second-order surfaces). 							
Prerequisites and co-requisites								
Assessment methods	Subject passin	Pass	Passing threshold			Percentage of the final grade		
and criteria	tests	50.0%			100.0%

Example issues/ example questions/ tasks being completed	Definition of scalar product.						
	Definition of vector product.						
	General equation of a plane.						
Work placement	Not applicable
