

Subject card

Subject name and code	Introduction to the measure theory, PG_00021502								
Field of study	Mathematics								
Date of commencement of studies	October 2023		Academic year of realisation of subject			2024/2025			
Education level	first-cycle studies		Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study			
Mode of study	Full-time studies		Mode of delivery			at the university			
Year of study	2		Language of instruction			Polish			
Semester of study	3		ECTS credits			4.0			
Learning profile	general academic profile		Assessment form			assessment			
Conducting unit	Divison of Differential Equations and Applications of Mathematics -> Institute of Applied Mathematics -> Faculty of Applied Physics and Mathematics						matics ->		
Name and surname of lecturer (lecturers)	Subject supervisor	dr hab. Piotr Bartłomiejczyk							
	Teachers		mgr inż. Tomasz Gzella						
		dr hab. Piotr Bartłomiejczyk							
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Projec	t	Seminar	SUM	
	Number of study hours	15.0	30.0	0.0	0.0		0.0	45	
	E-learning hours included: 0.0								
	Adresy na platformie eNauczanie: Wstęp do teorii miary - 24/25 ćw Moodle ID: 40828 https://enauczanie.pg.edu.pl/moodle/course/view.php?id=40828								
Learning activity and number of study hours	Learning activity Participation in classes includ plan				Self-study		SUM		
	Number of study hours 45			5.0		50.0		100	
Subject objectives	Equip students with specialized mathematical tools aided for technical subjects.								
Learning outcomes	Course outcome		Subject outcome			Method of verification			
	K6_U06		The student can give an example of a function that is integral in the Lebesgue sense, but not integral in the Riemann sense,			[SU4] Assessment of ability to use methods and tools [SU3] Assessment of ability to use knowledge gained from the subject			
	K6_U03		The student knows the differences between algebra and sigma-algebra and understands the consequences of these differences when constructing Jordan measure and Lebesgue measure.			[SU4] Assessment of ability to use methods and tools [SU3] Assessment of ability to use knowledge gained from the subject			
	K6_W02		The student is able to show that all the assumptions in Fatou's Lemma, the Monotonic Convergence Theorem and the Convergence Constraint Theorem are valid			[SW1] Assessment of factual knowledge			
	K6_U04		The student is able to count the Lebesgue measure of some sets, such as polygons on the plane, with the help of boundary transitions.			[SU4] Assessment of ability to use methods and tools			
	K6_U01		The student can formulate and prove the basic properties of Jordan measure, Lebesgue measure and abstract measure.			[SU2] Assessment of ability to analyse information			

Data wygenerowania: 22.11.2024 00:27 Strona 1 z 2

Subject contents	1. Theory of the integral 1.1 The extended set of real numbers 1.2 Measurable sets and functions 1.3 Limes inferior 1.4 Simple functions 1.5 Measures 1.6 Examples of spaces with measure 1.7 Operations in the set [0,infty].1.8 Integration of positive functions 1.9 Integration of complex functions 1.10. sets of measure zero 2. positive Borel measures 2.2 Riesz's representation theorem 2.3 Regularity of Borel measures 2.4 Lebesgue measure 2.5 Continuity vs. measurability 3. Complex measures 3.1 Variation of a measure 3.2 Positive and negative variation 3.3 Absolute continuity 3.4 Radon-Nikodym theorem					
Prerequisites and co-requisites	set theory, calculus					
Assessment methods	Subject passing criteria	Passing threshold	Percentage of the final grade			
and criteria	Colloquium no 1	51.0%	50.0%			
	Colloquium no 2	51.0%	50.0%			
Recommended reading	Basic literature	1) Walter Rudin, Real and complex analysis, PWN, 1986.				
	Supplementary literature	 P. Billingsley, Probability and measure, PWN 1979. K. Maurin, Analysis, PWN 1973. 				
	eResources addresses	Wstęp do teorii miary - 24/25 ćw Moodle ID: 40828 https://enauczanie.pg.edu.pl/moodle/course/view.php?id=40828				
Example issues/ example questions/ tasks being completed	Give the definition of measure and compute the measure of some sets.					
	Discuss the construction of integrals with respect to measure. Formulate and prove the monotone convergence theorem.					
Work placement	Not applicable
